THE ADMINISTRATORS OF THE TULANE EDUCATIONAL FUND

President, Esmond Phelps, A.B., LL.B.
1st Vice-President, Charles Rosen, A.B., LL.B.
2nd Vice-President, Ernest Lee Jahneke, B.E.

*Marcus Johns Magruder, M.D., LL.D.  
Samuel Zemurray  
Florence Dymond, A.B.  
Jules Blanc Monroe, A.B., LL.B.  
George Elliot Williams, B.E.  
Joseph Wheadon Carroll  
Charles Leverich Eshleman, A.B., M.D.

Charles Seyburn Williams  
Joseph Woodruff George, A.B.  
Albert Barnett Paterson  
Bernard Henry Grehan, B.E., C.E.  
Samuel Albert LeBlanc, LL.B.  
Alfred Bird Freeman  
Edgar Bloom Stern, B.A., M.A.

Ex-Officio  
James Houston Davis  
deLesseps Story Morrison  
Governor of Louisiana  
Mayor of New Orleans

John E. Coxe,  
State Superintendent of Public Education

Secretary and Treasurer, Lawrence Andre Wogan  
Assistant Secretary and Treasurer, Anthony Percy Generes

Medical Advisory Committee: Dr. Eshleman, Chairman; Mr. Paterson.

* Resigned effective January 15, 1946.
MINISTRATORS OF THE TULANE EDUCATIONAL FUND

Ex-Officio

Ex-Officio:

President, Esmond Phelps, A. B., LL. B.

Vice-President, Charles Rosen, A. B., LL. B.

Vice-President, Ernest Lee Jahncke, B. E.

Graduates:

Charles Seyburn Williams
Joseph Woodruff George, A. B.
Albert Barnett Paterson
Bernard Henry Grehan, B. E., C. E.
Samuel Albert LeBlanc, LL. B.
Edgar Bloom Stern, B. A., M. A.

Ex-Officio:

Maxwell Edward Lapham, M. D., F. A. C. S., Dean of the School of Medicine.

Hiram Watkins Kostmayer, B. A., M. D., Vice-Dean of the School of Medicine, and Director, Division of Graduate Medicine.

Charles Cassedy Bass, M. D., D.Sc., (Hon.), F.A.C.P., LL.D., Dean of the School of Medicine, Emeritus.

Rufus Carrollton Harris, A. B., LL. B., Juris. D., LL.D., President of the University.

William Walton Butterworth, M.D., Professor of Pediatrics, Emeritus.

Charles John Landfried, M. D., F. A. C. S., Professor of Otolaryngology, Emeritus.

John Taylor Halsey, M. D., Professor of Pharmacology, Emeritus.

Allan Chotard Eustis, B. S., Ph.B., M. D., F. A.C.P., Professor of Clinical Medicine, Emeritus.

Charles Franklin Craig, M. D., M. A., F. A. C. S., F. A.C.P., Professor of Tropical Medicine, Emeritus.

Paul Avery McIlhenny, M. D., F. A. C. S., Professor of Orthopedics, Emeritus.

Wiley Ross Buffington, M. D., Professor of Ophthalmology, Emeritus.

SCHOOL OF MEDICINE

FACULTY—1945-1946

Rufus Carrollton Harris, A. B., LL. B., Juris. D., LL. D., President of the University. 1776 State Street.

Maxwell Edward Lapham, M. D., F. A. C. S., Dean of the School of Medicine. 330 Carondelet Street.

Hiram Watkins Kostmayer, B. A., M. D., Vice-Dean of the School of Medicine, and Director, Division of Graduate Medicine. 424 Jeff Davis, Waveland, Miss.

Charles Cassedy Bass, M. D., D.Sc., (Hon.), F.A.C.P., LL.D., Dean of the School of Medicine, Emeritus. 1445 Philip Street.

PROFESSORS EMERITI

William Walton Butterworth, M.D., Professor of Pediatrics, Emeritus. 3914 Prytania Street.

Charles John Landfried, M. D., F. A. C. S., Professor of Otolaryngology, Emeritus. 7529 Fig Street.

John Taylor Halsey, M. D., Professor of Pharmacology, Emeritus. Waveland, Mississippi.

Allan Chotard Eustis, B. S., Ph.B., M. D., F. A.C.P., Professor of Clinical Medicine, Emeritus. 1518 Webster Street.

Charles Franklin Craig, M. D., M. A., F. A. C. S., F. A.C.P., Colonel U. S. Army, M. C., Retired, D. S. M., Professor of Tropical Medicine, Emeritus. 2303 West Lillwood Avenue, San Antonio, Texas.

Paul Avery McIlhenny, M. D., F. A. C. S., Professor of Orthopedics, Emeritus.

Wiley Ross Buffington, M. D., Professor of Ophthalmology, Emeritus. 1312 First Street.
CHARLES CASSIDY BASS, M.D., D.Sc., (Hon.), F.A.C.P., LL.D., Professor of Experimental Medicine, Emeritus.
1445 Philip Street

CHARLES WARREN DUVAL, B.A., M.A., M.D., F.A.C.S., Professor of Pathology and Bacteriology, Emeritus.
San Jose, Calif.

STANFORD CHAILLE JAMISON, M.D., Professor of Clinical Medicine, Emeritus.

PROFESSORS

JOSEPH NOVELL ANE, B.S., M.D., Professor of Clinical Radiology.
3231 State Street Drive.

CHARLES LAFAYETTE BROWN, B.S., M.D., Professor of Clinical Otolaryngology.
27 Neron Place.

EDGAR BURNS, M.D., Professor of Clinical Urology.
3227 Coliseum Street.

GUY ALVIN CALDWELL, B.S., M.D., Professor of Orthopedics.
1640 State Street.

WILLIAM BURTON CLARK, M.D., Professor of Ophthalmology.
38 Farnham Place, Metairie Ridge.

CHARLES EDWARD DUNLAP, M.D., Professor of Pathology and Bacteriology.
7431 Hampson Street.

DEAN HOLLAND ECHOLS, Ph.D., M.D., Professor of Surgery (Neurosurgery).
1423 State Street.

ERNEST CARROLL FAUST, B.A., M.A., Ph.D., Professor of Parasitology.
2828 Octavia Street.

IDYS MIMS GAGE, M.D., F.A.C.S., Professor of Clinical Surgery.
7333 Jeannette Street.

CHARLES SHUTE HOLBROOK, B.S., M.D., F.A.C.P., Professor of Clinical Neuropsychiatry.
1737 Calhoun Street.

EDWARD LACY KING, B.A., M.D., F.A.C.S., Professor of Obstetrics.
2130 Audubon Street.

EDWIN HUGH LAWSON, B.S., M.D., Professor of Clinical Medicine.
7610 Nelson Street.

FRANCIS ERNEST LEJEUNE, B.S., M.A., M.D., Professor of Otolaryngology.
49 Audubon Boulevard.

RANDOLPH LYONS, B.A., M.D., Ph.B., F.A.C.P., 3 Audubon.

GEORGE ALFRED MAYER, M.D., F.A.C.S., Free Obstetrics.

HYMEN SAMUEL MAYERSON, B.A., Ph.D., Physiology.
401 Betz Place, Metairie Ridge.

LEON JOHN MENVILLE, M.D., Professor of Radiology.
Harvard University.

JOHN HERR MUSSEr, B.S., M.D., F.A.C.P., Professor of Clinical Medicine.

EDWARD WILLIAM ALTON OCHSNER, B.A., M.D., Sc. (Hon.), William Henderson Professor of Surgery (Plastic Surgery).

ARTHUR NEAL OWENS, B.S., M.D., Professor of Surgery (Plastic Surgery).

RALPH VICTOR PLATOU, B.S., M.D., M.S., Pediatrics.

JOHN GALBRAITH PRAKT, M.D., Professor of Surgery.

RALPH GRAFTON SMITH, B.A., M.A., M.D., Professor of Pharmacology.

WILBUR CLEVELAND SMITH, B.A., M.D., D.D.S., Professor of Gross Anatomy. (Resigned August 31, 1945.)

WILLIAM ANTHONY SODERMAN, B.S., M.D., Professor of Preventive Medicine.

MARTIN THOMAS STUDDIPORD, B.S., D.P.H., F.A.C.P., Professor of Preventive Medicine.

WILLIAM ALFRED WAGNER, M.D., F.A.C.P., Clinical Otolaryngology.

THEODORE ALBERT WATTERS, M.D., F.A.C.P., Clinical Otolaryngology.

WILLIAM BEAN WENDEL, B.S., D.P.H., Clinical Otolaryngology.

WILLIAM ALFRED WAGNER, M.D., F.A.C.P., Clinical Otolaryngology.
MAUD LOEBER, M.A., M.D., F.A.C.P., F.A.A.P., Professor of Clinical Pediatrics. 2619 Short Street.

RANDOLPH LYONS, B.A., M.D., Ph.B., F.A.C.P., Professor of Clinical Medicine.

GEORGE ALFRED MAYER, M.D., F.A.C.S., Professor of Clinical Obstetrics. 19 Rosa Park

HYMEN SAMUEL MAYERSON, B.A., Ph.D., Professor of Physiology. 401 Beta Place, Metairie Midge.

LEON JOHN MENVILLE, M.D., Professor of Radiology. 66 Fontainebleau Drive.

JOHN HERR MUSSER, B.S., M.D., F.A.C.P., Professor of Medicine. 1427 Second Street.

ARTHUR NEAL OWENS, B.S., M.D., Professor of Clinical Surgery (Plastic Surgery). 1806 Metairie Road.

RALPH VICTOR PLATOU, B.S., M.D., M.S., Professor of Pediatrics. 3610 Cambronne Street.

JOHN GALBRAITH PRATT, M.D., Professor of Ophthalmology. 1210 Octavia Street.

RALPH GRAFTON SMITH, B.A., M.A., M.D., Ph.D., Professor of Pharmacology. 5928 Chestnut Street.

WILBUR CLEVELAND SMITH, B.A., M.D., D.Sc., Professor of Gross Anatomy. (Resolved August 31, 1945.)

WILLIAM ANTHONY SODEMAN, B.S., M.D., F.A.C.P., Professor of Preventive Medicine. 1635 Sonist Street.

MARTIN THOMAS VAN STUDDIFORD, B.S., M.D., Professor of Clinical Dermatology. 538 St. Peter Street.

WILLIAM ALFRED WAGNER, M.D., F.A.C.S., Professor of Clinical Otolaryngology. 7030 Canal Boulevard.

THEODORE ALBERT WATTERS, B.S., M.D., Professor of Neuropsychiatry. (Resolved September 30, 1945.)

WILLIAM BEAN WENDEL, B.S., Ph.D., Professor of Biochemistry. (Appointment effective September 1, 1945.) 8326 Stroelitz Street.

ASSOCIATE PROFESSORS

GEORGE EDWARD BURCH, M.D., B.S., Associate Professor of Clinical and Experimental Medicine. 227 E. Livingston Place.

JOSEPH STEVEN D'ANTONI, M.D., Associate Professor of Tropical Medicine. 1825 Calhoun Street.

GRACE ARABELL GOLDSMITH, B.S., M.D., M.S., Associate Professor of Medicine. 1621 Peniston Street.

RALPH HEINRICH HEEREN, B.S., M.A. 1 Ph.D., M.D., Associate Professor of Preventive Medicine. 4719 Baronne Street.

ARTHUR ORWAY KASTLER, B.S., M.S., Ph.D., Associate Professor of Bio-Chemistry. 2005 Audubon Street.

CHAMP LYONS, B.S., M.D., Associate Professor of Surgery. (Appointment effective October 1, 1945.) 2331 Chestnut Street.

CHARLIE MARION LANE WILSON, B.S., M.D., Associate Professor of Medicine. 3001 Coliseum Street.

ASSISTANT PROFESSORS

LUCIAN WHITE ALEXANDER, M.D., F.A.C.S., Assistant Professor of Clinical Otolaryngology. 4010 St. Charles Avenue.

RUFUS HENRY ALLDREDGE, M.D., D. Sc., Assistant Professor of Clinical Orthopedics. (On leave July 1 through Oct. 31, 1946.) 5329 Hurst Street.

JOHN JOSEPH ARCHINARD, B.S., M.D., Assistant Professor of Clinical Medicine. 1241 N. Rampart Street.

HENRY JOSEPH BAYEY, B.S., M.D., Assistant Professor of Clinical Medicine. 630 Tulane Avenue.

WOODWARD DAVIS BEECHAM, B.A., M.D., Assistant Professor of Clinical Gynecology.

PAUL CHESTER BEAVER, B.A., M.S. Ph.D., Professor of Parasitology.

ROBERT BERNHARD, M.D., F.A.C.P., Associate Professor of Clinical Medicine.

EMILE BLOCH, M.D., F.A.C.S., Assistant Professor of Surgery.

DONOVAN, CLARENCE BROWNE, B.A., M.D., Associate Professor of Clinical Medicine. 4929 St. C.

ROY EDWIN BUTLER, B.A., M.D., Assistant Professor of Clinical Medicine. (Appointment effective January 1, 1946.) 5361 St. C.

ANSEL MARION CAINE, B.A., M.D., Assistant Professor of Surgery (Anesthesia.)

ARTHUR ANTHONY CAINE, Jr., B.A., M.D., Assistant Professor of Clinical Surgery.

OCTAVE CHARLES CASSEGRAIX, M.D., F.A.C.P., Professor of Clinical Surgery.

BENTLEY PRESCOTT COLOOCK, M.D., Assistant Professor of Clinical Surgery.

ANNA CATHERINE DANNEMANN COLLO, Assistant Professor of Clinical Neurphysiology.

SAMUEL HARVEY COLVIN, B.S., M.D., Assistant Professor of Pathology and Bacteriology. 1036 N.

FRANCIS JAMES COX, B.A., M.D., Assistant Professor of Clinical Orthopedics.

ALEXANDER RAMSAY CREBBIN, M.D., Assistant Professor of Clinical Ophthalmology. 105.

MICHAEL ELLIS DEBAKEY, B.S., M.D., Professor of Surgery.

ROY EDWARD DE LA HOUSSAYE, B.S., M.D., Assistant Professor of Clinical Pediatrics.

JOHN LEONARD DIXON, B.A., B.S., Assistant Professor of Surgery.

LOUIS JOSEPH DUBOS, Jr., B.A., M.D., Assistant Professor of Clinical Medicine.

ASSOCIATE PROFESSORS

LARRY BURCH, M. D., B. S., Associate Professor of Experimental Medicine. 237 E. Livingston Place

VEN D'ANTONI, M. D., Associate Professor of Medicine. 1825 Calhoun Street.

ELL GOLDSMITH, B. S., M. D., M. S., Associate Professor of Medicine. 1621 Peiislon Street.

HUGH HEEREN, B. S., M. A., Ph. D., M. D., M. P. H., Professor of Preventive Medicine. 4719 Baronne Street

WAY KASTLER, B. E., M. S., Ph. D., Associate Bio-Chemistry. 2005 Audubon Street.

CS. B. S., M. D., Associate Professor of Surgery. (Appointent effective October 1, 1945.) 2331 Chestnut Street

DLO, M. D., Associate Professor of Microscopic Anatomy. 2436 Jefferson Avenue.

LAGER REED, B. A., M. A., Ph. D., M. D., Associate Professor of Gross Anatomy. 243 Walnut Street.

SE SCOTT, B. S., Ph. D., M. D., Associate Professor of Surgery. 442 Lowerline Street.

WK SHAFFER, B. S., Ph. D., Associate Professor of Pathology. 2405 Prytania Street.

WME, B. S., M. D., Associate Professor of Medicine. 4605 St. Charles Avenue.

WILSON, B. S., M. D., Associate Professor of Medicine. 3001 Coliseum Street

ASSISTANT PROFESSORS

J. ALEXANDER, M. D., F. A. C. S., Assistant Professor of Clinical Otolaryngology. 4010 St. Charles Avenue.

Y ALLDRIDGE, M. D., D. Sc., Assistant Professor Orthopedics. (On leave July 1 through Oct. 31, 1946.) 5520 Hurst Street.

L ARCHINALD, B. S., M. D., Assistant Professor of Medicine. 1241 N. Rampart Street.

PH BAYON, B. S., M. D., Assistant Professor of Medicine. 1430 Tulare Avenue.

Leave 1945-46, resigned June 30, 1946.

WOODWARD DAVIS BEACHAM, B. A., B. S., M. D., F. A. C. S., Assistant Professor of Clinical Gynecology and Obstetrics. Monteleon Hotel.

PAUL CHESTER BEAVER, B. A., M. S., Ph. D., Assistant Professor of Parasitology. 2719 Coliseum Street.

ROBERT BERNHARD, M. D., F. A. C. F., Assistant Professor of Clinical Medicine. 3477 South Broad Street.

EMILE BLOCH, M. D., F. A. C. S., Assistant Professor of Clinical Surgery. 411 Broadway.

DONOVAN, CLARENCE BROWNE, B. A., M. D., Assistant Professor of Clinical Medicine. 4920 St. Charles Avenue.

MADDIE DAVIDSON, Secretary to the Dean. 8133 Hickory Street.
HISTORICAL STATEMENT

The School of Medicine was organized in September, 1834, as the Medical College of Louisiana, and in 1847 became the Medical Department of the University of Louisiana. The College began its first session in January, 1835, with eleven students. It was chartered April 2, 1835, and in March, 1836, issued the first degrees in medicine or in science ever conferred either in Louisiana or in the Southwest. On October 20, 1838, a course in Pharmacy was established, and in 1839, the first Master of Pharmacy degree was issued.

The Constitutional Convention of 1845 ordained the University of Louisiana, and adopted, as its Medical Department, the Medical College of Louisiana. It was not until 1847, however, that the University of Louisiana was organized by Act 49 of the Legislature of that year. At the same time the Law Department (now the College of Law) and the Academic Department (now the College of Arts and Sciences) were organized.

In 1884, the Administrators of the Tulane Educational Fund received from the Legislature of Louisiana (by Act 43 of that year) complete and perpetual control of the University of Louisiana. This Act placed the existing University of Louisiana under the perpetual care of the Tulane Administrators, with all its property, powers, privileges, immunities, and franchises, and with such other powers as might be necessary to enable them to "foster, maintain, and develop a great university in the city of New Orleans." By this same Act 43 the name of the institution was changed to The Tulane University of Louisiana. This Act was ratified at a general election in April, 1888, and was later ratified in the Constitutions of 1898, 1913, and 1921.

Beginning with the session of 1913-1914, the name of the Medical Department was changed to the College of Medicine, which embraced the School of Medicine, the School of Pharmacy, the Graduate School of Medicine, and the School of Dentistry (the last three of which have been discontinued). The School of Medicine is the oldest medical college in the Southwest. Through May, 1946, there have been graduated 7,998 in Medicine.

In 1891, Mrs. Ida A. Richardson, whose husband, Dr. T. G. Richardson, had been for many years associated with the Medical Department as Professor and as Dean, donated $25,000 to the University for the benefit of the School of Medicine. At her death on April 10, 1910, Mrs. Richardson showed her continued deep interest in the School by a bequest of $25,000.

At his death, on August 5, 1894, Dr. Albert B. Miles, Professor of Surgery, bequeathed to the Medical Department the sum of $10,000. This sum was used to equip the Miles Laboratory of Operative Surgery and helped in the establishment of the Miles Amphitheatre at the Charity Hospital, largely used for the benefit of Other much needed improvements at that time in Medicine were assisted through the generous bequest.

In 1916, Mr. Alexander Charles Hutchinson, of New Orlean's, bequeathed to the Administrators of the University in the laboratory and clinical facilities of the funds aggregating $746,000.

Since the opening of the session 1915-16, women have been graduated in Medicine.

In 1916, Colonel William G. Vincent, of New Orleans, donated $500,000 to the Medical Department of the University of establishing a Chair to be known as the Professorship of Tropical Diseases and Hygiene.

In 1917, among other gifts to the University, Morgan Harrod, of New Orleans, bequeathed a sum in memory of her husband, the sum of $50,000.

In 1921, the General Education Board of New York each contributed the sum of $25,000 to the endowment of the University for additional research. The General Education Board donated the sum of $100,000 to the erection and equipment of a building which was used for research work and fellowship purposes.

In fulfillment of the above pledges, the Carnegie Foundation paid to the University of the School of Medicine the sum of $857,500, and in 1927, the General Education Board paid $10,000 to endow the School of Medicine in the sum of $50,000.

On July 10, 1922, the Administrators of the Fund accepted from Mr. and Mrs. Leon E. Schwartze, a donation to the School of Medicine of $50,000, to be used for the establishment and equipment of a laboratory and teaching facilities for the study of Tropical Diseases and Hygiene.

In 1925, Mr. and Mrs. Leon E. Schwartz, of New York City, paid to the University $50,000 for a period of five years, for the permanent trust to be known as "The David E. Schwartz Research Fund," the interest on the fund to be used for research work and fellowship purposes.

In 1927, the General Education Board paid to the University the sum of $50,000.

In 1929, Mr. and Mrs. Leon E. Schwartz, of New York City, paid to the University $50,000 for a period of five years.

In 1930, the General Education Board paid to the University the sum of $50,000.

In 1931, the General Education Board paid to the University the sum of $50,000.

In 1932, the General Education Board paid to the University the sum of $50,000.

In 1933, the General Education Board paid to the University the sum of $50,000.

In 1934, the General Education Board paid to the University the sum of $50,000.

In 1935, the General Education Board paid to the University the sum of $50,000.

In 1936, the General Education Board paid to the University the sum of $50,000.

In 1937, the General Education Board paid to the University the sum of $50,000.

In 1938, the General Education Board paid to the University the sum of $50,000.

In 1939, the General Education Board paid to the University the sum of $50,000.

In 1940, the General Education Board paid to the University the sum of $50,000.

In 1941, the General Education Board paid to the University the sum of $50,000.

In 1942, the General Education Board paid to the University the sum of $50,000.

In 1943, the General Education Board paid to the University the sum of $50,000.

In 1944, the General Education Board paid to the University the sum of $50,000.

In 1945, the General Education Board paid to the University the sum of $50,000.

In 1946, the General Education Board paid to the University the sum of $50,000.
HISTORICAL STATEMENT

The School of Medicine was organized in September, 1834, as the Medical College of Louisiana, and in 1847 became the Medical Department of the University of Louisiana. The College began its course, in January, 1835, with eleven students. It was chartered in March, 1836, issued the first degrees in medicine ever conferred either in Louisiana or in the Southwest. In 1858, a course in Pharmacy was established, and in 1866 a course in Dentistry. The School of Medicine is the oldest in the Southwest. Through May, 1946, there have been 7,996 in Medicine.

H. A. Richardson, whose husband, Dr. T. G. Richardson, for many years associated with the Medical Department and as Dean, donated $140,000 to the University of the School of Medicine. At her death on April 10, 1918, shows her continued deep interest in the School of Medicine.

On August 5, 1894, Dr. Albert B. Miles, Professor of Medicine, the School of Medicine, the Graduate College, and the School of Dentistry (the last three of which were discontinued) in August, 1894, Dr. Albert B. Miles, Professor of the School of Medicine, the Graduate College, and the School of Dentistry (the last three of which were discontinued) in August, 1894, Dr. Albert B. Miles, Professor of Medicine, the Graduate College, and the School of Dentistry (the last three of which were discontinued) in August, 1894, Dr. Albert B. Miles, Professor of Medicine, the Graduate College, and the School of Dentistry (the last three of which were discontinued)

In 1902, Mr. Alexander Charles Hutchinson, of New Orleans, bequeathed $15,000 towards the running expense of Medicine, for improvements in the laboratory and clinical facilities of the School of Medicine, funds aggregating $746,000.

Since the opening of the session 1915-16, women have been admitted to the University on the same terms as men.

In 1915, the General Education Board and the Carnegie Corporation of New York each contributed the sum of $25,000 toward the running expenses of this School for the session of 1919-20. Following the campaign of the University for additional endowment, in 1920, the General Education Board donated the sum of $125,000 towards the erection and equipment of a building which would provide additional laboratory and teaching facilities for the pre-clinical subjects. The General Education Board and the Carnegie Corporation of New York agreed, pending the completion of certain contracts with the University, to contribute jointly toward the support of the School $77,000 each year, this sum representing the interest on $1,550,000.

In fulfillment of the above pledges, the Carnegie Corporation of New York, on July 1, 1923, paid to the University for the endowment of the School of Medicine the sum of $837,500, and on October 10, 1927, the General Education Board paid to the University for the endowment of the School of Medicine the sum of $712,500.

On July 10, 1929, the Administrators of the Tulane Educational Fund accepted from Mr. and Mrs. Leon E. Schwartz, of New Orleans, a donation to the School of Medicine of $20,000 for the purpose of establishing in memory of their son, David Trautman Schwartz, a permanent trust to be known as the "David Trautman Schwartz Research Fund," the interest on the fund to be devoted entirely to research work and fellowship purposes in the School of Medicine. From year to year up to the present time, various sums have been contributed by Mr. and Mrs. Leon E. Schwartz, Mr. and Mrs. Edgar Newman, and Mr. Herbert J. Schwartz towards increasing the original donation.

In 1925, the General Education Board agreed to give $15,000 a year for a period of five years, later extended to six years, towards the support of the Department of Medicine and, in 1929, to give $30,000 a year for a period of five years towards the support of the Department of Surgery. These annual gifts were renewed in 1932 for an additional period of seven years.
The School of Medicine received the sum of $500, anonymously given, for the furtherance of the investigation of leprosy, and several sums of money were given by Mrs. Isidore Newman for research in the Department of Pathology in the same field.

On February 11th, 1924, the Administrators of the Tulane Educational Fund ratified the action of the President of the University in accepting the donation of $12,000.00 of Mrs. Maurice Stern for the founding of "The Maurice Stern Fund for Medical Literature," the income from this fund to be used for the purchase of medical periodicals and books for the Library of the School of Medicine.

In 1925, the School of Medicine received, through an anonymous donor, the sum of $1,500 to establish the "Dr. E. S. Lewis Student Loan Fund," in recognition of the eminent services of Dr. Ernest S. Lewis to the School of Medicine and to the medical profession. This fund was increased by contributions from the graduating classes of 1930 and 1931. Contributions from other interested persons also have been received since this fund was created.

In 1923, a fund for the "Isadore Dyer Memorial Prize for Medical Scholarship" was created to perpetuate the memory of the late Dr. Dyer, former dean of the School of Medicine. Liberal contributions totaling over $700 were received from graduates who were either students at the time of his death or had been graduated during the incumbency of Dr. Dyer.

In 1925, the Junior League, of New Orleans, agreed to donate an amount not exceeding $4,000 annually, for the purpose of establishing a model obstetrical clinic and to provide for two fellowships in Obstetrics and one in Pediatrics, to be offered to graduate students whose training was to be known as the Junior League Fellowships. This was later reduced to $2,400 annually for the support of one fellowship in Obstetrics and one in Pediatrics, and still later to $1,200 annually for one in Obstetrics. These fellowships were discontinued with the close of the session 1931-32.

During 1925 and 1926, certain philanthropists in New Orleans, who were interested in the development of a strong Department of Tropical Medicine at Tulane, agreed to give, during a three-year period, an amount sufficient, in addition to the income from the Vincent bequest, to bring the annual income for the Department of Tropical Medicine to $25,000.

In 1932, the School of Medicine acquired through the will of Dr. Marcus Feingold, Professor of Ophthalmology, whose death occurred on December 26, 1925, his valuable ophthalmologic library. The Faculty, mindful of this great and rare legacy, treasures this gift as one of its most highly prized possessions, to be preserved and perpetuated in all its usefulness as a special division of the library of the School of Medicine, where it is now known as the "Feingold Collection," as an inspiration of the abiding spirit of the donor.

In 1936, the University accepted the dental library and the dental museum that had been collected chiefly by members of the dental profession in honor of, and to perpetuate the memory of, the late Dr. Charles Edmund Kells, to be known as The Kells Dental Library and Museum. The library collection is being increased constantly. It is used extensively by both the dental and the medical profession.

The museum collection is being increased all the time by contributions of suitable material and specimens, in separate rooms adjacent to the Dental Clinic Memorial.

In 1928, an appropriation of $1,250,000 was made to the Education Board for the erection and equipment of the new building. This building was formally opened on December 26, 1925. Marcus Feingold, Professor of Ophthalmology, whose death occurred on December 26, 1925, his valuable ophthalmologic library. The proceeds from the sale of this library were used to purchase equipment for the Department of Tropical Medicine. The value of this fund, to date, is $500,000.

In 1926, the School of Medicine acquired through the will of Dr. Marcus Feingold, Professor of Ophthalmology, whose death occurred on December 26, 1925, his valuable ophthalmologic library. The proceeds from the sale of this library were used to purchase equipment for the Department of Tropical Medicine. The value of this fund, to date, is $500,000.

In 1926, the School of Medicine acquired through the will of Dr. Marcus Feingold, Professor of Ophthalmology, whose death occurred on December 26, 1925, his valuable ophthalmologic library. The proceeds from the sale of this library were used to purchase equipment for the Department of Tropical Medicine. The value of this fund, to date, is $500,000.
The museum collection is being increased all the time by further contributions of suitable material and specimens. It is now located in separate rooms adjacent to the Dental Clinic in the Hutchinson Memorial.

In 1928, an appropriation of $1,250,000 was made by the General Education Board for the erection and equipment of the New Clinic Building. This building was formally opened on December 10, 1930.

In 1929, an anonymous donor gave the sum of $5,000 to establish the Edgar Newman Research Fund in the School of Medicine. Contributions from others interested have been added to this fund.

In 1928, Mrs. Harry Dennery donated the sum of $2,000 to establish the Harry Dennery Research Fund in the School of Medicine. Subsequently, additions have been made to this Fund by members of the family.

In 1930-31, and subsequently, sums of money totaling about $66,500, were received from the bequest of Ada G. Ross for a free Psychiatric Clinic.

From 1930-31 to 1941-42, Mr. Eckstein Case, of Cleveland, Ohio, contributed to the support of the Departments of Tropical and Preventive Medicine.

Beginning with the session 1931-32, the Commonwealth Fund of New York agreed to give to the School of Medicine $15,000 a year for a period of three years and a gradually reduced amount for the next nine years, to establish a Department of Preventive Medicine and to promote the development of courses in Preventive Medicine in the School of Medicine.

In 1931 the Commonwealth Fund began a $10,000 yearly grant to the Graduate School of Medicine for a period of five years, and thereafter the grant was to be on a gradually decreasing basis. Subsequently, the Graduate School of Medicine became the Department of Graduate Medicine of the School of Medicine, and the subsidy was continued to that Department.

The opening and operation of the Hutchinson Memorial Clinic, during the session 1932-33, were made possible by a contribution, for the first three years, of $25,000 a year from the Commonwealth Fund and, for the second three-year period, by a contribution of $25,000 a year from the General Education Board.

The Senior Class of 1932 in the School of Medicine presented a contribution which is intended to be the nucleus of a loan fund with the hope that it will do much toward the development of medical students who need financial assistance to enable them to complete their studies.

In 1933, the Violet I. Hart Fund was established by Mr. Mike S. Hart, in memory of his sister, to provide an annual award to known as the "Matas Award in Vascular Surgery." Donations have been made anonymously, over a period of several years, towards a trust fund for the support of the Department of Medicine. The value of this fund, to date, is approximately $200,000.
In 1937, the Rockefeller Foundation agreed to give the sum of $8,000 a year, for a period of three years, towards the development and support of the Division of Psychiatry in the School of Medicine. $10,000 a year for the same purpose, was subsequently granted for the next three years.

In 1937, Mrs. Elizabeth Miller, in memory of her father, donated funds, subject to renewal from year to year to establish the C. Jeff Miller Fellowship in Gynecology.

In 1937, Mr. E. W. Brown, Jr., of Orange, Texas, donated to the Department of Gynecology, the sum of $3,500, subject to renewal from year to year for a period of five years.

In 1937, the Commonwealth Fund of New York agreed to give to the School of Medicine the sum of $5,400 a year, for a period of two years, for fellowships in Pediatrics.

In 1937, Mrs. Sidney K. Simon and a few of the close friends of Dr. Sidney K. Simon, late Professor of Gastro-enterology in Tulane University, donated in his memory $1,000 as an endowment fund, the income from which is to be given as a prize to the student making the best grade in, or contributing the best essay on, Diseases of the Digestive Tract, Nutritional Diseases or Tropical Medicine.

In 1937, the Commonwealth Fund gave a yearly grant of $15,000 for three years, to inaugurate the Division of Medical Extension, and this grant was extended in 1939, for three more years.

In 1937, the Mississippi State Board of Health and the Mississippi State Medical Association, together, gave a grant of $5,500 for the Division of Medical Extension for the support of extension teaching for physicians in that State, for a period of three years. This amount was renewed for a period of at least one year more.

In 1938, the State of Alabama Department of Public Health and the Medical Association of the State of Alabama, together, gave a grant of $5,500 for at least a three-year period, for similar extension teaching to physicians in that State. This amount was subsequently renewed for a period of three more years.

In 1938, Mrs. Stella B. Lemans, in memory of her husband, Dr. Isaac Ivan Lemans, late Professor of Clinical Medicine, donated $5,000 as an endowment fund, the income from which is to be used for the purchase of books on diabetes, nephritis and tuberculosis for the Library of the School of Medicine and thereby to build up the Isaac I. Lemans collection which had already been started with books on Diabetes through a gift from an anonymous donor for this purpose.

In 1938, ‘The William Henderson Chair of Surgery’ was endowed in memory of William Henderson, a philanthropic citizen of New Orleans, on account of the great interest taken by him in the health and welfare of his City and State.

In 1938, Dr. Benjamin Bernard Weinstein, in memory of his sister, Miss Eva Evelyn Weinstein, donated to the Rudolph Matas Medical Library a unique collection of books consisting of essays, novels, poems and plays by and about physicians, and agreed to contribute the sum of $100.00 per year for an indefinite period in collection known as the ‘Eva Evelyn Weinstein’.

In 1940, Mrs. Stella K. Burns created the James E. W. Brown, Jr. Professorship of Preventive Medicine in memory of her husband, Dr. Rudolph Matas Medical Library. The income from this fund has continued and is subject to yearly renewal.

In 1940, the Foundation for Tropical Medicine, a fund to support teaching in Tropical Medicine, was set up with a grant of $9,000 to the Department of Tropical Medicine, for graduate teaching of Latin American physicians, in 1941 and in 1942, this grant was increased to $20,000. In 1943, the Administration of this fund decided to expand considerably and the subsidy will now support graduate teaching in Tropical Medicine.

The class of 1941, at its graduation, gave a gift of $200,000 to the School of Medicine for further development of Tropical Medicine.

In 1941, the Commonwealth Fund began a memorial fund of Preventive Medicine and the Department of Preventive Medicine. This grant will allow the Department of Preventive Medicine to expand considerably and the subsidy will now support graduate teaching in Preventive Medicine.

In 1941, the Rockefeller Foundation made a grant of $200,000 to the School of Medicine for further development of Tropical Medicine. This grant has continued and been increased to $286,500.

In 1941, the Rockefeller Foundation made a grant of $10,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1941, Mrs. Sidney K. Simon, in memory of her husband, Dr. Isaac I. Lemans, late Professor of Gastro-enterology in Tulane University, donated in his memory $1,000 as an endowment fund, the income from which is to be used for the purchase of books on diabetes, nephritis and tuberculosis for the Library of the School of Medicine and thereby to build up the Isaac I. Lemans collection which had already been started with books on Diabetes through a gift from an anonymous donor for this purpose.

In 1941, The W. K. Kellogg Foundation made a grant of $10,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1942, The W. K. Kellogg Foundation made a grant of $10,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1941, the Trustees of the Rockefeller Foundation made a grant of $200,000 to the School of Medicine for further development of Tropical Medicine. This fund has continued and been increased to $286,500.

In 1942, The W. K. Kellogg Foundation made a grant of $200,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1943, the Administration of the Tulane E. W. Brown, Jr. Professorship of Preventive Medicine received a gift of $10,000 from the Trustees of the Rockefeller Foundation for the support of extension teaching in Preventive Medicine. The income from this fund is used to support graduate teaching in Preventive Medicine.

In 1943, the Trustees of the Rockefeller Foundation made a grant of $200,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1943, the Trustees of the Rockefeller Foundation made a grant of $200,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1943, the Trustees of the Rockefeller Foundation made a grant of $200,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1943, the Trustees of the Rockefeller Foundation made a grant of $200,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.

In 1943, the Trustees of the Rockefeller Foundation made a grant of $200,000 to the School of Medicine, to be used as a general fund. This grant has continued and been increased to $286,500.
Rockefeller Foundation agreed to give the sum of $8,000 for a period of three years, towards the development of Psychiatry in the School of Medicine, for the same purpose, was subsequently granted for five years.

Elizabeth Miller, in memory of her father, donated to expand the C. Jeffers Fund in Gynecology.

E. W. Brown, Jr., of Orange, Texas, donated to the Gynecology, the sum of $1,000, subject to renewal for a period of five years.

Commonwealth Fund of New York agreed to give to the Rudolph Matas Medical Library in memory of her father, the late Professor of Clinical Medicine, donated by an anonymous donor for this purpose, was subsequently granted for a period of three more years.

Stella H. Lemann, in memory of her husband, Dr. William Henderson, a philanthropic citizen of New York, donated the Henderson Fund of New York agreed to give the sum of $9,000 for the support of extension teaching in Alabama, together, gave a grant of $1,000 to the Department of Tropical Medicine. This grant will amount approximately to $2,500 for the first year to year to establish the E. Menage Research Fund in Dermatology. The income from this fund is to be used for the acquisition of books consisting of essays, novels, and about physicians, and agreed to contribute the sum of $100.00 per year for an indefinite period for additions to this collection known as the "Eva Evelyn Weinstein Memorial Collection."

In 1940, Mrs. Stella K. Burns created the James D. Kenney Fund for the purchase of immediately needed books and periodicals.

In 1949, the Foundation for Tropical Medicine made a grant of $9,000 to the Department of Tropical Medicine, particularly for postgraduate teaching of Latin American physicians. This was repeated in 1941 and in 1942, this grant was increased to $15,000 per annum.

In 1940, the W. K. Kellogg Foundation made an outright grant of $200,000 to the School of Medicine for further development in the Department of Tropical Medicine.

In 1941, the Commonwealth Fund began a subsidy to the Department of Preventive Medicine and the Department of Graduate Medicine. This grant will allow the Department of Preventive Medicine to expand considerably and the subsidy will assist both in the intramural and extramural postgraduate teaching in the Department of Graduate Medicine. The grant will amount approximately to $150,000 per a period of several years.

The class of 1941, at its graduation made a gift to the Senior Medical Student Loan Fund of $286.50. This generous donation has enhanced the value of the Fund very materially for a most worthy cause.

In 1942, The W. K. Kellogg Foundation made an outright grant of $10,000 to the School of Medicine, to be used as loans or scholarships for medical students. While this fund is primarily intended for students who have been accepted by the military services, other students may also be assisted since the problem of staffing hospitals is well recognized.

In 1943, the Administrators of the Tulane Educational Fund received by bequest the entire remainder of the estate of Dr. Henry E. Menage. The income from this fund is for the use of the Medical Department in the study of the causes, prevention and cure of diseases of the skin. It is designated as the Henry E. and Henrietta Menage Research Fund in Dermatology.

In 1943, the Trustees of the Rockefeller Foundation made available to the Departments of Medicine and Parasitology the sum of $8,000 each. This money is to be used for the support of young men when they are able to return to civilian lives as interns, residents or instructors under the supervision of the heads of the departments of medicine and parasitology, the period over which it is to be used not to exceed four years.
In 1943, the bequest of $30,000.00 made to the Administrators by Miss Aimee Greagh Denis, was received for the establishment of a memorial to her sister, the late Dr. Willey Glover Denis, formerly Professor of Bio-Chemistry, for the Willey Glover Denis Fellowship in Biological Chemistry in the School of Medicine.

In 1945, Miss Sarah F. Henderson bequeathed the sum of $1,014,608.00 for the establishment of the William Henderson Chair for the Prevention of Tropical and Semi-Tropical Diseases. At the same time, she bequeathed the sum of $60,000.00 to be credited to the William Henderson Pension Fund for the Chair of Surgery.

On April 10, 1945, the Administrators of the Tulane Educational Fund accepted a gift of $5,000.00 per annum for a period of two years from the Carolyn Rose Strauss Foundation, of Monroe, Louisiana, for the establishment of the "Carolyn Rose Strauss Fellowship in Orthopedics" in the School of Medicine, for teaching and research in the Department of Orthopedics. The gift was made in memory of Carolyn Rose Strauss, the daughter of Mr. and Mrs. Clifford M. Strauss and the granddaughter of Mr. Fred Strauss, all residents of Monroe, La.

In 1945, Mrs. Herman Bertram Gessner, of New Orleans, gave to the Rudolph Matas Medical Library in the School of Medicine, in memory of her husband, the sum of $1,000, in the name of herself and her children.

The graduating class of 1946 established a fund for the purpose of promoting research by the students and faculty of the School of Medicine. This fund is to be used in supplement to present allocations to the School of Medicine for research purposes. The name of the program shall be "The Tulane Medical Research Fund."

Donations have been received from a number of interested parties towards a fund for the support of research in the Department of Gynecology by members of the School of Medicine faculty. This fund is to be known as the "Weinstein Research Fund in Gynecology."

FACILITIES AND CLINICAL ADVANTAGES

The School of Medicine has unusually adequate and satisfactory laboratories and other teaching facilities provided by the buildings comprising the School. In addition, the wards and out-patient clinics of the Charity Hospital and the Touro Infirmary offer exceptional opportunities and advantages for study in the clinical branches. As a result, this School possesses the means of giving to its students a sound and thorough training both in the fundamental sciences and in the clinical subjects.

The professors and clinical instructors are attending physicians or surgeons to the various hospitals and visit their wards and clinics regularly, accompanied by the students, who are brought into immediate contact with patients and are taught practical bedside work. This includes all modern methods of clinical, microscopic and laboratory diagnosis. Surgical diagnosis and operative technic are demonstrated. Lectures are delivered upon selected cases in the amphitheatres and operating rooms of the hospitals.

Special clinical instruction is given to all students fourth years, who are for this purpose divided assigned to clerkships by the teaching staffs in the out-patient clinics of the hospitals.

In the Hutchinson Memorial Clinic Building contain the necessary equipment and facilities in the private offices of practicing physicians. Under members of the staff, senior students examine assigned to them in the same way they should be Small sections of students rotate from one desk throughout the session in such way that each advantages of all the departments sometime during.

Clinics in all branches, where demonstrations are and of service, are held daily in the Clinics or in the auditorium of The Hutchinson Building. Sections of the classes are taught gross and demonstrations in the autopsy rooms of the departments of the hospitals and in the special laboratories and Richardson Buildings.

For the study of diseases of the South and also of tropical origin, there is no field superior to Charity Hospital.

BUILDINGS AND HOUSITAS

The Josephine Hutchinson Memorial Clinic on Tulane Avenue just across Lafayette Street Hospital, and connected to it by a tunnel, was cut in December, 1939. This nine-story building has 600 square feet, and provides (1) the administration library, with provision in the main reading room and special reading rooms, for over 140 readers lecture hall or auditorium, with modern projection; (2) a special clinic and x-ray equipped and complete provisions for all of the different laboratories for the examination of patients, conference rooms and offices, facilities for research and other special work students, both graduate and undergraduate.

The interests of the organized medical profess are promoted by provision in this building rooms and library facilities for the Orleans Pit and the Louisiana State Medical Society, both their domicile.

The Richardson Memorial Building on the Swain the large and completely equipped teaching and lecture rooms of the departments of Zool and Bacteriology, Physiology, and Pharmacology, and the School Museum of Anatomy, a large collection of specimens made by the late Professor Edmund.
Special clinical instruction is given to all students of the third and fourth years, who are for this purpose divided into sections and assigned to clerkships by the teaching staffs in charge of wards and out-patient clinics of the hospitals.

In the Hutchinson Memorial Clinic Building the student offices contain the necessary equipment and facilities usually found in the private offices of practicing physicians. Under the supervision of members of the staff, senior students examine and treat patients assigned to them in the same way they should do it later in practice. Small sections of students come from one department to the other throughout the session in such way that each student receives the advantages of all the departments sometime during the year.

Clinics in all branches, where demonstrations of cases are practicable and of service, are held daily in the Charity Hospital amphitheaters or in the auditorium of The Hutchinson Memorial.

Sections of the classes are taught gross and special pathology by demonstrations in the autopsy rooms of the Pathological Department of the hospitals and in the special laboratories of the Hutchinson and Richardson Buildings.

For the study of diseases of the South and also of exotic conditions of tropical origin, there is no field superior to the wards of the Charity Hospital.

BUILDINGS AND HOSPITALS

The Josephine Hutchinson Memorial Clinic Building, located on Tulane Avenue just across LaSalle Street from the Charity Hospital, and connected to it by a tunnel, was completed and occupied in December, 1930. This nine story building has a floor area of 145,000 square feet, and provides (1) the administration offices; (2) the library, with provision in the main reading room, the periodical room and special reading rooms, for over 140 readers; (3) a large lecture hall or auditorium, with modern projection facilities, including theatrical projection; (4) clinical and x-ray laboratories; (5) adequate and complete provisions for all of the different clinical departments, including laboratory rooms for the examination and treatment of patients, conference rooms and offices; (6) laboratories and facilities for research and other special work of the staff and students, both graduate and undergraduate.

The interests of the organized medical profession of the community are promoted by provision in this building for offices, meeting rooms and library facilities for the Orleans Parish Medical Society and the Louisiana State Medical Society, both of which make this their domicile.

The Richardson Memorial Building on the Tulane Campus contains the large and completely equipped teaching and research laboratories and lecture rooms of the departments of Anatomy, Pathology and Bacteriology, Physiology, and Pharmacology. It houses also the Souchon Museum of Anatomy, a large collection of anatomical specimens made by the late Professor Edmond Souchon.
Dinwiddie Hall, immediately adjacent to Richardson Memorial, provides additional lecture rooms, and teaching and research laboratories for Biochemistry.

These last two mentioned buildings afford facilities for the thorough instruction of students in their first two years in medicine which are in accord with the demands of modern medical education.

Charity Hospital. The use of the wards and clinics of the Charity Hospital of Louisiana, in New Orleans, founded in 1797, has been given by the Legislature, in perpetuity, to the teaching staff of the School of Medicine of The Tulane University of Louisiana, for the practical instruction of its students in all the divisions of medicine and surgery. Medical students are given free access to the Charity Hospital, and enjoy splendid opportunities therein.

In addition to the ward services at Charity Hospital there are out-patient clinics representing all the different specialties in the field of medical practice, where large numbers of patients are cared for, presenting the greatest variety of instructive clinical problems and conditions.

A new, modern and larger Charity Hospital building was erected in 1939 at a cost of more than twelve million dollars. The Tulane Unit in the new building comprises well over 1000 beds. The visiting staff in this unit consists entirely of members of the faculty appointed upon the recommendation of the School.

Touro Infirmary. This institution represents an excellent type of hospital in the detail and equipment of all of its departments. The Faculty of the Tulane School of Medicine is well represented on the staff at Touro, and free use is made by our clinical teachers and the students of the Tulane School of Medicine of the efficiently conducted medical and obstetrical wards as well as of the out-patient clinics of the institution.

LIBRARIES

The Rudolph Matas Medical Library is located in the Hutchison Memorial. Its reading rooms are equipped for the students' needs. Approximately 45,186 books, and 8,774 pamphlets, are available for reference; current Journals are in a special periodical room for the use of students and faculty.

In November, 1937, the School of Medicine honored itself and its illustrious alumnus, Dr. Rudolph Matas, by naming its Library the Rudolph Matas Medical Library. Dr. Matas has been the Library's greatest benefactor, ever interested in the extension of its facilities and of its service, for the use of the medical profession and in the training of physicians.

A branch of the Medical School Library is located in the Richardson Memorial, on the Tulane Campus, for the use of students of the first two years.

The library of the Orleans Parish Medical Society, administered jointly with the Rudolph Matas Medical Library, includes approximately 28,443 books and current journals.

The Isaac Iven Leman collection on diabetes, one of the best in the country on this subject.

The Feingold Ophthalmologic collection, a national treasure especially interesting.

The Kells dental collection numbers about 1000 and includes a good proportion of all the serials of current interest.

Books may be withdrawn from the libraries by the use of students and faculty.

The libraries are open from 8:30 a.m. to 4:30 p.m. through Friday, and from 8:30 a.m. to 1 p.m. on Saturday.

INTERNSHIPS

Charity Hospital. The Administrators of the hospital select annually a large proportion of their interesting class of the Tulane School of Medicine.

Touro Infirmary. Several interns are selected annually from the graduating class of the Tulane School of Medicine, as Interns of the Touro Infirmary. A student not selected to serve during his Senior year, under supervision that he continue after graduation for an intern in Pathology at Touro Infirmary.

Other Hospital Internships. The Hotel Dieu, the Mercy Hospital, the French Hospital, the Charity Central Hospital usually select many of the graduating class of the Tulane School of Medicine.

A number of other Class A hospitals, in Texas and many other States throughout the United States are interested in the selection for intern appointments. A committee assists the Senior students in procuring the best assignments.

STATE AND NATIONAL BOARD EXAMINATIONS

Graduates of the School of Medicine are eligible for Board examinations in the United States upon recommendation of the National Board of Medical Examiners at Tulane two or three times a year.

AWARDS AND SCHOLARSHIPS

The Stars and Bars Chapter of the Alpha Omicron Sigma Fraternity. Membership in this Fraternity is limited to ten students in the fourth year class in the School of Medicine for the next five years. The selection of ten students is based on the highest combined averages on the work of the students, with the addition to these, the highest two students in the graduating class are selected as probates for the same honor.
The Isaac Ivan Lemann collection on diabetes is rapidly becoming one of the best in the country on this subject.

The Feingold Ophthalmologic collection, of about 2,400 volumes, is an attraction to those especially interested in the subject.

The Kells dental collection numbers approximately 450 volumes and includes a good proportion of all the scientific dental journals of current interest.

Books may be withdrawn from the libraries for student use over night and for week-ends.

The libraries are open from 8:30 a.m. to 4 p.m. on Saturday.

**INTERNSHIPS**

Charity Hospital. The Administrators of the Charity Hospital select annually a large proportion of their interns from the graduating class of the Tulane School of Medicine.

Touro Infirmary. Several interns are selected annually from the graduating class of the Tulane School of Medicine by the Administrators of the Touro Infirmary. A student intern in Pathology is selected to serve during his Senior year, under salary, with the provision that he continue after graduation for a second year, as an intern in Pathology at Touro Infirmary.

Other Hospital Internships. The Hotel Dieu, the Baptist Hospital, the Mercy Hospital, the French Hospital and the Illinois Central Hospital usually select many of their interns from the graduating class of the Tulane School of Medicine.

A number of other Class A hospitals, in Louisiana, Texas and many other States throughout the country, offer opportunities for intern appointments. A committee of the faculty assists the Senior students in procuring the best internships available.

**STATE AND NATIONAL BOARD EXAMINATIONS**

Graduates of the School of Medicine are eligible for all State Board examinations in the United States upon proper certification by the School. The National Board of Medical Examiners gives its examinations at Tulane two or three times a year for Parts I, II and III.

**AWARDS AND SCHOLARSHIPS**

The Stars and Bars Chapter of the Alpha Omegas Alpha Honorary Fraternity. Membership in this Fraternity is earned through scholarship. The selection of ten students is made each year from the fourth year class in the School of Medicine who have the highest combined averages on the work of the first three years. In addition to these, the highest two students in the Junior year are selected as probates for the same honor.
The Imadora Dyer Memorial Prize for Medical Scholarship. This prize, a gold medal, is awarded annually to the graduate making the highest combined average for the full four years' course in the School of Medicine.

The Jacob C. Geiger Medal. Senior students in the School of Medicine and graduate students in the University working for advanced degrees are eligible to compete for this medal. This award is offered by Dr. Jacob Casson Geiger, Clinical Professor of Epidemiology in the University of California, and Mrs. Geiger, for the best thesis on a subject related to public health problems that are of importance to either the Southern States or countries contiguous to the Southern States.

The Sidney K. Simon Memorial Prize. The prize of approximately $50 is awarded each year to the student who makes the best grades in, or contributes the best essay on, one of the following subjects: Diseases of the Digestive Tract, Nutritional Diseases, or Tropical Medicine.

Prize for Medicine. The Professor of Medicine offers annually a prize of $50 in books to the Senior student presenting the best thesis on a subject related to internal medicine.

The Walter Reed Memorial Medal. The Louisiana State Medical Society offers annually a medal for the best thesis submitted on a subject having to do with tropical or preventive medicine.

Breaux Scholarships. These scholarships were established in 1926 under the will of the late Judge Joseph A. Breaux. Limited numbers are awarded each year and some of these are available to Louisiana students registered in the School of Medicine. Further information may be secured from the office of the Dean.

The Querens-Rives-Shore Award. Senior students in the School of Medicine are eligible to compete for this prize. This award was made possible by a gift from Dr. and Mrs. Percy L. Querens, in honor of their parents and grandparents, of a U.S. Government Bond, the annual income from which is to be offered each year to the Senior student submitting the best thesis on Cardiology. Presentation of this award is to be made each year by the Stars and Bars Chapter of the Alpha Omega Alpha Honor Medical Fraternity.

GRADUATE MEDICAL COURSES

The School of Medicine offers, through the Division of Graduate Medicine, continuous courses for physicians. Various types of instruction and opportunities for graduate study are available. All staff members and all facilities of every department of the School of Medicine may be utilized for such graduate or continuation courses as may be arranged in accordance with the needs of the individual physician.

(a) Courses Leading to Advanced Degrees. Medical graduate who wish to do graduate study in any department towards advanced degrees must be qualified for such study and acceptable to the head of the department. They must register with the requirements of the Graduate School which confers the degree. In general, two years are required for the Master of Science degree. The Ph.D. degree normally requires a minimum of three years of practical experience for assistant staff. The final examination is based on the thesis, two typewritten copies of an abstract of approximately eighteen hundred words, and each candidate for the Doctor's degree must be present in person at the time of the final examination. The abstract and the thesis must be submitted to the Departmental Committee.

(b) Long Courses Not Leading to Advanced Degrees. Medical graduate who are qualified and acceptable may register for courses in some of the departments for periods of one year or less, without applying for advanced degrees. They are eligible for the awards of the School and for the prizes and scholarships of the University. The applicant must satisfy the requirements of the School and must be recommended by the Graduate Committee.

(c) For the immediate post-war period it is possible to arrange for short intensive courses in some of the departments. Special arrangements are made by the Dean for the immediate post-war period. Regular courses are described in a separate announcement.

(d) Short Intensive Courses in Special Fields. Short intensive courses in the department of Tropical Medicine are described in a separate announcement.

(e) Review Courses for Practicing Physicians. These courses are described in a separate announcement.

(f) Tropical Medicine. A five months' course in Tropical Medicine is described in a separate announcement.
The Professor of Medicine offers annually a prize for the best essay on one of the following subjects: Digestive Tract, Nutritional Diseases, or Tropical Medicine. The prize is awarded to the Senior student presenting the best essay related to internal medicine.

The Louisiana State Medical College Memorial Medal. The Louisiana State Medical College awarded a medal for the best thesis submitted on a subject related to internal medicine each year to the student who makes the best grades in the School of Medicine working for the degree. In general, two years of residence is required for the Master of Science degree. The Doctor of Philosophy degree normally requires a minimum of three years. It is quite practicable for assistants and candidates to pursue studies in the School of Medicine for periods of one year or more, and for others on a fellowship basis to pursue studies towards degrees, in addition to their assigned duties. Each candidate for the Master's degree shall present, together with his thesis, two typewritten copies of an abstract of approximately one thousand words in length, and each candidate for the Doctor's degree shall present, together with his thesis, two typewritten copies of an abstract of approximately fifteen hundred to two thousand words in length. The abstract, as well as the thesis, must be approved by the Thesis Committee.

(b) Long Courses Not Leading to Advanced Degrees. Graduate physicians who are qualified and acceptable may pursue graduate courses in some of the departments for periods of a year or more without applying for advanced degrees. They must serve as assistants in the department whether or not the position carries a salary. Generally such students will not be accepted for a period of less than one year.

(c) For the immediate post-war period it is planned to provide an increased number of assistantships in most departments to accommodate demobilized physicians seeking this type of study.

(d) Short Intensive Courses in Special Limited Fields. It is possible to arrange for short intensive courses in special limited fields in some of the departments. Special arrangements are necessary in each case and may be made by correspondence.

(e) Review Courses for Practicing Physicians. Review courses of four or five days will be offered throughout the usual teaching session. They cover general fields, as medicine, surgery, pediatrics, obstetrics and gynecology, or special topics such as venereal diseases, cardiovascular diseases, etc. These and other short courses are described in a separate announcement.

Ample clinical facilities are available for teaching purposes through the use of the Hutchinson Memorial Clinic, the Charity Hospital, and the Eye, Ear, Nose, and Throat Hospital.

(f) Tropical Medicine. A five months course is given each Winter. Medical Parasitology and Clinical Tropical Medicine are thoroughly covered. A separate leaflet announcement is available.
The One Hundred and Thirteenth session of the School of Medicine began on September 1, 1945 and ended on May 15, 1946. The One Hundred and Fourteenth session will begin on September 3, 1946 at 8:00 a.m.

After approximately four years of an accelerated program due to the exigencies of the war, the School of Medicine will return to a single yearly session beginning with the next session September 3, 1946. The regular session, however, has been lengthened to thirty-seven weeks duration.

The Army and Navy contracts for training of medical students for these services terminated during the session 1945-46.

Students of the first two years are taught in the Richardson Memorial and Dinwiddle Hall on the University Campus. These two years are mainly devoted to basic science subjects, with some introduction to clinical subjects in the last half of the sophomore year. During the last two years the courses are given in the Hutchinson Memorial, 1430 Tulane Ave., and at the various institutions with which the School of Medicine is associated, that is, the Charity Hospital, The Touro Infirmary, etc. These final two years are devoted mainly to clinical work in the wards and operating rooms and out-patient departments of these hospitals and to work in the laboratories, library and conference rooms of the Hutchinson Memorial.

The School of Medicine offers the regular four-year course in medicine leading to the degree of Doctor of Medicine and, through the Department of Graduate Medicine, general and special courses for practising physicians and other medical graduates.

REQUIREMENTS FOR ADMISSION

The first year class beginning September 3, 1946 is filled.

1. Applicants must write a personal letter to the Dean’s office, requesting the application blank which they must fill out and return with a recent, clear, finished, unmounted photograph, size 2½ x 3.

2. The Medical Aptitude Test is required of all applicants. This test is given each year at all Colleges of Arts and Sciences under the auspices of the Association of American Medical Colleges. It is also suggested that the Graduate Record Examination be taken.

3. Applicants are required to present original certificates from all colleges attended, which must show credits completed in colleges approved by the Council on Medical Education and Hospitals of the American Medical Association.

4. In selecting applicants for admission, in so far as possible to those whose scholastic superior ability. No applicant will be considered Point Ratio is less than 1.0 and greater considered those with better attainments.

5. The equivalent of three academic years work in an approved college of arts and science admission. These requirements consist of the required subjects, amounting to 38 semester hours listed may not be substituted by any other subjects. These are electives and may be selected from among under suggested electives.

The following table of Pre-Medical work is as for the prospective medical student at Tulane:

Foreign Language
3. In selecting applicants for admission, preference is given in so far as possible to those whose scholastic records indicate superior ability. No applicant will be considered whose Quality Point Ratio is less than 1.0 and greater consideration will be given to those with better attainment.

4. The equivalent of three academic years of pre-medical work in an approved college of arts and sciences is required for admission. These requirements consist of the specifically required subjects, amounting to 38 semester hours listed below, and which may not be substituted by any other subjects. The remaining hours are electives and may be selected from among the subjects listed under suggested electives.

The following table of Pre-Medical work is suggested as a guide for the prospective medical student at Tulane:

<table>
<thead>
<tr>
<th>Required Subjects</th>
<th>Semester Hours</th>

39
In choosing elective courses the student should bear in mind that some pre-medical studies serve primarily as an immediate foundation for work in the School of Medicine and that others have broader educational values. Generally it will be found profitable to select not less than about half of the elective credits from courses listed in Group I, above. The suitability of particular courses will depend upon individual preparation and needs; the student should seek faculty advice before an elective program is determined.

No credit will be allowed towards admission to the School of Medicine for courses in physical training, military training, music or dogmatic religion.

6. Applicants for admission to the Freshman Class, who have been out of school for any length of time, either during their college courses or following their completion, must write a letter giving the nature of their occupation during such periods, and must state that they have or have not attended any other medical school.

7. Final commitment will not be made to an applicant for admission to the School of Medicine until after a personal interview with the applicant; and applicants living within five hundred miles of New Orleans will be required to come to New Orleans for this interview, while applicants living five hundred or more miles from New Orleans may come here for an interview or may arrange through the Dean's office for an interview by an alumnus or other person in the locality reasonably convenient to the applicant. This requirement will become effective for the class entering September 5, 1946.

8. The School of Medicine reserves the right to refuse admission to any applicant without assignment of reasons.

**Admission from Tulane College of Arts and Sciences and Newcomb College:** The School of Medicine will consider for admission only those students from the College of Arts and Sciences and Newcomb who will have earned in their pre-medical years, in the period prescribed by these Colleges, a quality point ratio of 1.0 or better, that is, not less than a C average.

The School of Medicine will give preferential consideration to bonafide residents of Louisiana who have taken their pre-medical work in Tulane University and who meet all the qualifications established by the School of Medicine. Automatic admission upon meeting the minimum requirements of the School of Medicine no longer exists.

The Tulane College of Arts and Sciences and the School of Medicine offer the combined Scientific-Medical program of four years leading to the degree of Bachelor of Science. This course comprises three years of prescribed work in the Scientific-Medical Program of the College of Arts and Sciences and the first year in the School of Medicine. The Scientific-Medical program must be completed with a quality point ratio of not less than 1.0 (C average). Upon the successful completion of this combined program the students will be recommended for Bachelor of Science.

In the Freshman year in Medicine, candidates for this combined program must register in the College of Sciences as well as in the School of Medicine. It will be charged for such registration.

The Bachelor of Science degree is not awarded students from other academic colleges, unless the least one year in the Tulane College of Arts and must be the year immediately preceding his admission of Medicine, and satisfies the academic requirements for the degree. Advanced standing for work in other academic schools is allowed towards the B.8. degree when Tulane provided the school is on the list of approved, the record of the student is otherwise satisfactory.

**ADVANCED STANDING**

A few students are accepted annually as transfers from schools where only the first two years of a four-year course are given.

Such students must have completed their pre-medical training, during the year immediately preceding his admissions to Medicine, and must have completed satisfactorily as given at Tulane in the first two years of the medical school.

A satisfactory record and honorable dismissal previously attended are required.

No credit is allowed for any subject which may in advance of the year in which it is required at Tulane.

No examinations are held for the removal of credit obtained elsewhere.

Students are not accepted as transfers into schools where the full four-year course is given.

**COMMITTEE ON ADMISSIONS AND QUALIFICATIONS**

The Committee on Selections, consisting of members of the Medical Faculty, passes on the credentials of all students seeking admission and no student is accepted without the committee.

Committees from the Faculty review the work who are deficient, and make recommendations as to the future status of these students.
elective courses the student should bear in mind that the courses serve primarily as an immediate preparation for medical studies and that others are valued. Generally it will be found profitless to spend upon individual preparation and needs; the student is advised to seek faculty advice before an elective program is chosen.

Approved for admission to the Freshman Class, who have been in school for any length of time, either during their college or high school preparation, must write a letter of explanation of their preparedness during such periods, and if they have or have not attended any other medical school or college. The suitability of particular courses will be the responsibility of the student and will be considered in the preparation for admission.

No commitment will not be made to an applicant for admission to the School of Medicine until after a personal interview, and applicants living within five hundred miles of New Orleans for this year will be required to come to New Orleans for this interview or may arrange with the office for an interview by an alumnus or other faculty member in their locality reasonably convenient to the applicant. No additional fee will be charged for such registration.

The Bachelor of Science degree is not awarded by Tulane to students from other academic colleges, unless the student spends at least one year in the Tulane College of Arts and Sciences, which must be the year immediately preceding his admission to the School of Medicine, and satisfies the academic requirements of that College for the degree. Advanced standing for work done in other academic schools is allowed towards the B. S. degree awarded by Tulane provided the school is on the list of approved schools and the record of the student is otherwise satisfactory.

ADVANCED STANDING

A few students are accepted annually as transfers to the third year class from schools where only the first two years of the medical course are given.

Such students must have completed their pre-medical work in accordance with our requirements, prior to beginning the study of medicine, and must have completed satisfactorily all the subjects as given at Tulane in the first two years of the medical course.

A satisfactory record and honorable dismissal from schools previously attended are required.

No credit is allowed for any subject which may have been taken in advance of the year in which it is required at this School. No examinations are held for the removal of conditions contracted elsewhere. Students are not accepted as transfers to advanced standing from schools where the full four-year course in medicine is given, nor are students accepted for advanced standing for any other than the third year class.

COMMITTEE ON ADMISSIONS AND QUALIFICATIONS

The Committee on Selections, consisting of members of the Medical Faculty, passes on the credentials of all students applying for admission and no student is accepted without the approval of that committee.

Committees from the Faculty review the work of all students who are deficient, and make recommendations to the Faculty as to the future status of these students.
RULES GOVERNING PROMOTION, DISMISSAL, READMISSION AND GRADUATION OF STUDENTS

1. The Faculty reserves the right to be the judge of the fitness of any student to continue in his studies, to be promoted or to be recommended for graduation. Any student may be dismissed at any time, if he is deemed unfit to continue.

2. Passing grades of 70 or above in each of the subjects of the year are required for advancement to the succeeding year and for graduation.

3. A student will not be allowed to continue in this school if the weighted average of his grades in all subjects of the year is below 70.

4. A student will be entitled to a re-examination on any subject in which he has a condition provided that the weighted average of his first grades in all the subjects of the year is 70 or above.

5. A student failing to receive a passing grade on a condition examination in any subject is required to repeat that subject.

6. No student may repeat a course more than once, and no condition examination is allowed on a repeated course.

7. Condition examinations are not given on any subject during the regular session in which the condition was contracted.

8. Courses may be taken in this school for the removal of conditions if and when such courses are offered, or in another school, provided the Head of the Department in which the condition was acquired agrees in advance to the acceptance of credit for the proposed course taken elsewhere.

9. A student who withdraws voluntarily during the session for any cause is eligible to return and resume work where he left off, provided he had a weighted average of 70 or above at the time of withdrawal.

10. A student who withdraws during the session, whose weighted average grade was below 70 at the time of withdrawal, will not be readmitted unless he can present a satisfactory explanation for his failure, subject to Faculty approval. Such student, if readmitted, will be required to repeat all the work of the year.

11. Senior students failing courses may be permitted to take reexamination just prior to the comprehensive examination, with the exception that those failing in the last block may not be allowed a reexamination until a period of one month has elapsed from the time of the failed examination.

12. Any student, who, during his courses in this School, convicts himself of defective education in any subject required for admission, will be required to remove this disability before promotion.

13. The penalty for cheating for grades, or for dishonesty in any form, is expulsion from the School.
GOVERNING PROMOTION, DISMISSAL, READMISSION AND GRADUATION
OF STUDENTS

Only those students who have completed the requirements for advancement to the succeeding year and for graduation are eligible to be promoted to the succeeding year. Any student who fails to pass the comprehensive examination for graduation is allowed to take a similar examination to be offered at the end of the Summer School, and, if successful, is then recommended for graduation. If unsuccessful, he may be readmitted to repeat the year in full only by special action of the Faculty in each case.

REQUIREMENTS FOR GRADUATION

1. Every candidate for graduation must be of good moral character, which includes good conduct while a student of the School of Medicine.
2. He must have attained the age of twenty-one years.
3. He must have complied with all the educational requirements.
4. No student may graduate owing fees to the University.
5. A recent photograph of himself must be furnished by the candidate for the files of the School of Medicine.

Senior Comprehensive Examinations

A comprehensive examination for graduation, to which all students who have credit for the entire courses of the Senior Year are eligible, is held on the mornings of Monday and Tuesday before Commencement Week.

Students who pass the comprehensive examination for graduation with grades of 70 or above are recommended for graduation. Any student failing to make a passing grade of 70 on the comprehensive examination is allowed to take a similar examination to be offered at the end of the Summer School, and, if successful, is then recommended for graduation; if unsuccessful, he may be readmitted to repeat the year in full only by special action of the Faculty in each case.

REQUIREMENTS FOR GRADUATION

1. Every candidate for graduation must be of good moral character, which includes good conduct while a student of the School of Medicine.
2. He must have attained the age of twenty-one years.
3. He must have complied with all the educational requirements.
4. No student may graduate owing fees to the University.
5. A recent photograph of himself must be furnished by the candidate for the files of the School of Medicine.

Course VIII
Ophthalmology, Otolaryngology, Preventive Medicine and Tropical Medicine.

GENERAL INFORMATION

Session 1946-47

Beginning with the session 1946-47, a general fee of $550.00 will be charged all students for the academic year.

Students who are admitted for the first time are required to make a deposit of $175.00 as soon as they are notified of their acceptance. This amount will be credited on account of the regular fee. This deposit will not be refunded if the student fails to report for registration. No place will be held for a new applicant until the above requirement has been fulfilled.

The general fee may be paid in two installments. The first payment, in the amount of $300.00, must be paid before September 3, 1946, and the second payment in the amount of $250.00, must be paid before January 16, 1947.

A refund of $250.00 will be made to students properly withdrawing within three weeks after the beginning of each semester.

All students are required to register during the week preceding the opening of their respective classes.

Students receiving remittances from home are advised to obtain them in cashier's checks on New Orleans or New York banks, or in Post Office or Express money orders. Students sometimes have difficulty in cashing personal checks drawn on out-of-town banks, and such checks are not cashed by the Bursar.

No diploma or certificate of credits will be given to a student who is in default on any payment due the University or any college or department thereof.

There are no special fees except penalty fees of $5.00 each, for late registration and for special examinations.

Any unusual destruction of University property however, including laboratory equipment will be collected from the responsible student.

The tuition includes library privileges, health service, physical training, athletic privileges, student activities, anatomical material and the diploma.

On request to the Dean's office parents or guardians are furnished with copies of students' records, at the end of each session.

Microscope. Each student entering the School of Medicine is required to furnish his own microscope, which must meet with the approval of the Professor of Microscopic Anatomy, or, in the case of students entering the Junior Class from other schools, the Director of the Laboratory of Clinical Medicine. Local instrument
dealers are informed as to the specifications required. New microscopes are urgently recommended. Students are advised not to purchase microscopes or other equipment, or books until they report for registration in August.

Boarding Houses. Information about houses for boarding and lodging may be obtained from the Registrar of the University (Station 20). The price usually paid by students is approximately $45.00 to $60.00 per month. A list of desirable boarding houses is prepared shortly before the opening of the session and may be consulted by students on their arrival at the University.

Correspondence intended for medical students in the Freshman and Sophomore years should be addressed Tulane Campus, Station 20, New Orleans 15, La.; for students in the Junior and Senior years, 1430 Tulane Avenue, New Orleans 13, La.

For other information, address:
Dean, Tulane School of Medicine
1430 Tulane Avenue, New Orleans 13, Louisiana

REGULAR COURSES OF INSTRUCTION

DEPARTMENT OF ANATOMY

HAROLD CUMMINS, Professor. (Head of Department.)
ADRIAN FARAGHER REED, Associate Professor.
EDGAR CARL SENSENIG, Assistant Professor.
HOMER DALE KIRGIS, Assistant Professor.
THEODORE SNook, Associate Professor.
Manuel Casiano Lores, Instructor.
Eleanor Solomon Gold, Assistant.
Joseph Davidson Calhoun, Assistant.
Fernand Joseph Dastugue, Jr., Assistant.
Robert L. Rye, Assistant.
John William Overstreet, Assistant.

Effort is made to correlate the gross, microscopic approaches to the study of structure of the human body to associate structure and function. Special emphasis is given to practical considerations. Laboratory studies occupy a large portion of the time, but there are frequent lectures on theoretical instruction. Instruction is given in morning periods, each 3½ hours.

Histology, September 3—November 2
Embryology, November 4—December 5
Gross Anatomy, December 6—April 19
Neuroanatomy, April 21—May 24.

Histology. (Prof. Cummins and Staff.) This course includes cell structure, the fundamental tissues and the microscopic structure of organs, exclusive of the central nervous system.

Embryology. (Prof. Snook and Staff.) The embryo as a whole, beginning with fertilization and growth, is traced in detail. The fetal membrane of the uterus in pregnancy are emphasized.

Gross Anatomy. (Prof. Reed and Staff.) The sections performed in this order: head, neck, upper extremity; abdomen and pelvis; lower extremity.

Neuroanatomy. (Prof. Kirgis and Staff.) The microscopic anatomy of the central nervous system, a survey of the principal functional pathways.

Text-books—Each student is expected to be familiar with the standard medical dictionaries, together with the required texts listed below: Gross Anatomy—Maximow-Bloom or Bailey; Embryology—Andrews; Anatomy—Ranson. An atlas of anatomy is recommended.

47
REGULAR COURSES OF INSTRUCTION

DEPARTMENT OF ANATOMY

HAROLD CUMMINGS, Professor. (Head of Department)
ADRIAN FARAGHER REED, Associate Professor.
EDGAR CARL SENSENIG, Assistant Professor.
HOMER DAVE KIRGIS, Assistant Professor.
THEODORE SNOOK, Assistant Professor.
Manuel Casiano Lores, Instructor.
Eleanor Solomon Gould, Assistant.
Joseph Davidson Calhoun, Assistant.
Fernand Joseph Dastugue, Jr., Assistant.
Robert L. Pye, Assistant.
John William Overstreet, Assistant.

Effort is made to correlate the gross, microscopic and developmental approaches to the study of structure of the human body, as well as to associate structure and function. Special emphasis is placed upon practical considerations. Laboratory studies occupy the larger share of the time, but there are frequent lectures and quiz conferences. Instruction is given in morning periods, each 3 1/2 hours:

- Histology, September 3—November 2
- Embryology, November 4—December 5
- Gross Anatomy, December 6—April 19
- Neuroanatomy, April 21—May 24.

Histology. (Prof. Cummings and Staff.) This course is devoted to cell structure, the fundamental tissues and the minute and microscopic structure of organs, exclusive of the central nervous system.

Embryology. (Prof. Snook and Staff.) The development of the embryo as a whole, beginning with fertilization, and of the tissues and organs is traced in detail. The fetal membranes and the structure of the uterus in pregnancy are emphasized.

Gross Anatomy. (Prof. Reed and Staff.) A systematic dissection is performed in this order: back, head, neck and thorax; upper extremity; abdomen and pelvis; lower extremity.

Neuroanatomy. (Prof. Kirgis and Staff.) Study of the gross and microscopic anatomy of the central nervous system is followed by a survey of the principal functional pathways.

Textbooks—Each student is expected to be provided with one of the standard medical dictionaries, together with latest editions of the required texts listed below: Gross Anatomy—Gray; Histology—Maximow-Bloom or Bailey; Embryology—Arey or Patten; Neuroanatomy—Manson. An atlas of anatomy is recommended.
BIOCHEMISTRY This course is given in the afternoons during the first half of the year. Five hours per week are devoted to lectures, conferences and quizzes. Laboratory periods follow the didactic work on three afternoons of each week (nine hours).

The course in biochemistry includes a study of the carbohydrates, lipids, proteins, vitamins and minerals, both as foods and as component parts of the body fluids and tissues. The digestive and metabolic changes which these substances undergo in the body under normal conditions and in disease are especially emphasized. Blood and urine are treated in considerable detail. The roles of enzymes and hormones as regulators of cellular and tissue activities are considered.

The laboratory work is designed to illustrate certain phases of the lecture material. Emphasis is placed upon quantitative relationships.

GRADUATE COURSES The bulletin of the Graduate School should be consulted. Investigation of special problems may be undertaken by qualified students.

DEPARTMENT OF GYNECOLOGY

Hiram Watkins Kostmayer, Professor.
Edward Perry Thomas, Assistant Professor.
Chapman Gordon Johnson, Assistant Professor.
Woodard Davis Beacham, Assistant Professor.
Eugene Hendrix Counts, Assistant Professor.
John Anstine Holmes, Assistant Professor.
Benjamin Bernard Weinstein, Assistant Professor.
Curtis Hartman Tyrce, Assistant Professor.
Ruble Eugene Moor, Instructor.
Robert Emile Rouquet, Jr., Instructor.
John Conant Wood, Instructor.
Melvin David Steiner, Instructor.
Oren Richard Dey, Instructor.
Claude Grover Callender, Instructor.
John Stephen Herring, Instructor.
Edward William Nelson, Instructor.
Julius Wiston Davenport, Instructor.
George Frank Sustendal, Instructor.
Isadore Dyer, Instructor.

The announcement of the Graduate Courses is consulted for descriptions of courses, seminar and provision for consultation in the Department of Anatomy.

Third Year

In the third year two sections of students designated B are assigned to a combined, coordinated course in Obstetrics and Pediatrics for a period of 12 weeks. Sections A and B attend didactic lectures during each week in Pediatrics, Gynecology and Obstetrics. During the first half of the year, both sections spend two hours devoted to Obstetric Pathology. Section A will spend seven weeks in Obstetric clinics and Section B in Gynecologic and Obstetric clinics and wards. Both sections will have the same time in Pediatric clinics and wards. At weeks they interchange. Quizzes and ward rounds are taken regularly.

Fourth Year

During the fourth year two sections of students designated A and B are assigned to a combined correlated course in Gynecology, Obstetrics for a period of ten weeks. Both sections attend offices in Hutchinson Memorial Clinic and will be on duty Tuesday and Thursday morning and work in whatever Gynecologic Obstetric clinics which are functioning at that time. The main specialized clinics, such as Sterility, Gynecologic and Obstetric Pathology, Congenital Syphilis, or of five weeks one section, A, spends the entire five weeks in Obstetric clinics and the other section, B, spends the entire five weeks in Gynecologic clinics and in Obstetric Pathology. Toxemia of Pregnancy, Congenital Syphilis, and Obstetric Pathology clinics are functioning at that time. Both sections attend five to six hours clinic (morning) and Post Operative Follow-up Clinic at Hutchinson Memorial Hospital. During this same time, Section B attends at the end of five weeks, sections A and B interchange.

DEPARTMENT OF MEDICINE

John Herx Murdock, Professor. (Head of Department)
Charles Shute Holbrook, Professor.
Leon John Menville, Professor.
Randolph Lyons, Professor.
Martin Thomas Van Studdiford, Professor.
Joseph Novell Ane, Professor.
Edwin Hugh Lawson, Professor.
Roy Hope Turner, Professor.
Julius Lake Wilson, Associate Professor.
Grace Abraham Goldsmith, Associate Professor.
George Edward Burch, Associate Professor.
Louis Joseph Dubos, Assistant Professor.
Philip Harold Jones, Assistant Professor.
Robert Bernhard, Assistant Professor.
GRADUATE COURSES

The announcement of the Graduate School may be consulted for description of special advanced courses, seminar and provision for research in the Department of Anatomy.

Third Year

In the third year two sections of students designated as A and B are assigned to a combined, coordinated course in Gynecology, Obstetrics and Pediatrics for a period of 12 weeks. During the 12 weeks, sections A and B attend didactic lectures three afternoons a week in Pediatrics, Gynecology and Obstetrics. One afternoon a week both sections spend two hours devoted to Gynecologic and Obstetric Pathology. Section A will spend seven weeks in Gynecologic and Obstetric clinics and wards. Section B will spend the same time in Pediatric clinics and wards. At the end of seven weeks they interchange. Quizzes and ward rounds will be held regularly.

Fourth Year

During the fourth year two sections of students are assigned to a combined correlated course in Gynecology, Obstetrics and Pediatrics for a period of ten weeks. Both sections will be assigned offices in Hutchinson Memorial Clinic and will remain there the entire day Tuesday and Thursday and on Wednesday and Saturday mornings, and work in whatever Gynecologic, Obstetric and Pediatric clinics which are functioning at that time. These clinics are in the main specialized clinics, such as Sterility, Gynecologic Endocrinology, Toxemia of Pregnancy, Congenital Syphilis, etc. For a period of five weeks one section, A, spends the entire day on Monday and Friday in the Gynecologic Clinic (mornings) and Post Partum and Post Operative Follow-up Clinics (afternoons) at Charity Hospital. During this same time, Section B attends Pediatric Clinics. At the end of five weeks, sections A and B interchange.
THEORY AND PRACTICE OF PHYSICIAN DIAGNOSIS

Second Year

Physical Diagnosis (Professor Musser, Dubois and Staff)

Professor Musser gives a systematic lecture course of physical diagnosis once a week and third trimesters. The relations of regional an and physics to diagnosis are impressed upon the student. The course is divided into sections and the members, under Professor Musser and his staff, practice on the standard methods of physical diagnosis. Accurate familiarity with the normal signs are the aims.

Introductory (Professors Burch and Thomas)

Medicine with the course in physical diagnosis lectures and clinics introductory given once a week for a period of two trimesters deal first with the explanation of the mechanisms of some of the most important expressions of disease followed by lectures on the cardiovascular system with emphasis being paid to the diagnosis by physical examination of the patient, as are constantly required in the practice of medicine. The course includes methods of examination of blood, urine, exudates and other material. Emphasis is on the diagnosis of diseases commonly met with in practice.

William Rankin Arrowsmith, Instructor.

Sol Stern, Instructor.
William Duncan Davis, Instructor.
Joseph Vincent Schlosser, Instructor.
Joseph Edwin Schechthal, Instructor.
Lodwick Sterrett Meriwether, Instructor.
Alan Goldman, Instructor.
Edgar Hugh Little, Instructor.
Nathan Goldstein, Instructor.
John Calvin McLeod, Instructor.
Pierre Patillo Poole, Instructor.
Angus Douglas Grace, Instructor.
Elbert Jogue Soakis, Instructor.
Andrew Anthony Pringles, Instructor.
John Patrick Conway, Instructor.
John Howard Woodbridge, Assistant.
Cyril Thompson Yancey, Assistant.
Morton Levy, Assistant.
Frederick Louis Reuter, Assistant.
George Eckel Felker, Assistant.
Louis Ray Cabbine, Assistant.
William Rankin Arrowsmith, Instructor.
Maridel Saunders, Instructor.
Sol Stern, Instructor.
William Duncan Davis, Instructor.
Joseph Vincent Schlosser, Instructor.
Joseph Edwin Schenthal, Instructor.
Lodwick Sterritt Meriwether, Instructor.
Alan Goldman, Instructor.
Edgar Hugh Little, Instructor.
Nathan Goldstein, Instructor.
John Calvin McLeod, Instructor.
Pierre Patillo Poole, Instructor.
Angus Douglas Grace, Instructor.
Elbert Joque Soaki, Instructor.
Andrew Antonio Princos, Instructor.
John Patrick Conway, Instructor.
John Howard Woodbridge, Assistant.
Cyril Thompson Yancey, Assistant.
Morton Levy, Assistant.
Frederick Louis Reuter, Assistant.
George Eckel Felknor, Assistant.
Louis Ray Cabiran, Assistant.

THEORY AND PRACTICE OF MEDICINE

Second Year

Physical Diagnosis (Professor Musser, Dubos and Staff)—Professor Musser gives a systematic lecture course on the elements of physical diagnosis once a week during the second and third trimesters. The relations of regional anatomy, physiology, and physics to diagnosis are impressed upon the student. The class is divided into sections and the members, under the guidance of Professor Musser and his staff, practice on the normal subject the standard methods of physical diagnosis. Accurate technic and familiarity with the normal signs are the aims.

Introductory Medicine (Professors Burch and Thompson). Concurrently with the course in physical diagnosis a series of lectures and clinics introductory to medicine are given once a week for a period of two trimesters. These lectures deal first with the explanation of the mechanism of the production of some of the most important expressions of disease. These are followed by lectures on the cardiovascular system with special emphasis being paid to the diagnosis by physical examination.

Laboratory of Clinical Medicine (Professor Lawson and Staff). In this course the student is drilled in the technic of ordinary clinical laboratory examinations, such as are constantly required in the practice of medicine. The course includes methods of examination of blood, urine, stools, sputum, pus, exudates and other material. Emphasis is laid upon laboratory diagnosis of diseases commonly met with in this section of the
country. The object is to train the student thoroughly to do the clinical laboratory work covered in this course so that he will be prepared to make the necessary examinations on patients studied by him in the clinical work of the third and fourth years and in his subsequent practice.

Each student must furnish his own microscope with mechanical stage, blood counter and pipette, platinum loop, slides, test tubes, cover-glasses, hemoglobin scale, centrifuge tubes, syringes and laboratory book. Students should not purchase apparatus until they have been definitely informed of the kind best suited to their needs.

Third Year
Theory and Practice of Medicine
Three hours in each morning are devoted to work on the ward as clinical clerks and in conference. This course consists of lectures twice a week on the most important diseases, or some of the expressions of the disturbed physiology of disease, or the care of the sick in a bi-weekly clinic-therapeutic conference. A systematic series of assigned recitations is held twice a week for one trimester for each third of the class. In addition, subjects are assigned for collateral reading in current medical literature.

Diagnostic and Therapeutic Clinic
(Professors Musser and Turner) Once a week patients from the medical wards are presented to the class. The students are divided into two equal parts, each consisting of four sections: H (heart), L (lungs), S (special), and G (general). Time for the course is divided into two equal parts, each consisting of 12 mornings and 10 afternoons and the course is given twice, once for each one-half of the class. Portion F and L are given during the mornings from 8 to 12 and S and G during the afternoons from 1 to 4. Each teaching exercise is conducted for groups of five students or multiples of five. In teaching history taking the technique and art of interviewing patients with a variety of disorders is illustrated by having an experienced clinician conduct the questioning of the patient while the students listen and make notes. Then each student immediately writes his version of the history which is criticized by the instructor. Instruction in physical diagnosis in this course is limited to a few of the most common and important signs so that time is allowed for sufficient repetition and drill for the student to acquire confidence in his findings. Exercises in evaluation of the patient's personality are included. At no time in the course is the student responsible for study of the patient as a whole.

Clinico-Pathologic (Professors Musser, Turner)
Conferences are held in the Department of Pathology, and the students work in the medical wards of the Charity Hospital and the Touro Infirmary daily for about twelve weeks. The students are divided into two equal parts, each consisting of four sections the students work as clinical clerks and in conference. This course is held twice a week for one trimester for each one-half of the class. In addition, subjects are assigned for collateral reading in current medical literature.

Fourth Year
Ward and Clinic Work
Goldsmith, Burch, Gillespie and Wirt. Sections the students work on the medical wards of the Charity Hospital and the Touro Infirmary daily for about twelve weeks. The students are divided into two equal parts, each consisting of four sections the students work as clinical clerks and in conference. This course is held twice a week for one trimester for each one-half of the class. In addition, subjects are assigned for collateral reading in current medical literature.

Courses at the Touro Infirmary Staff. One section of ten students to work at the Touro Infirmary in the medical dispensary and in the wards is occupied all day with work at Touro Infirmary.

Roentgenology (Professors Menzler, Anesh) Examinations and discussions of roentgen-ray and radium in diagnosis and therapy. The students have access to special apparatus and are thoroughly trained in the equipment of X-ray and radium in diagnosis and therapy. The examinations and discussions of roentgen-ray and radium in diagnosis and therapy are made under the instruction of the instructor.

Clinical Laboratory (Professors Lawson and Turner)
Work. The entire session, the student works in the clinical laboratory work in his office in the Hospital, which he keeps his microscope and other apparatus in connection with the patient’s disease. In the course he has access to the special laboratory of the hospital.

It is intended that the student make practical laboratory methods learned during the course for the benefit of all laboratory tests and studies that are necessary.
Clinico-Pathologic (Professors Musser, Turner and Staff). These conferences are held in conjunction with the Department of Pathology. The clinical aspects are discussed, when possible, by a member of the staff who is unfamiliar with the case.

Fourth Year

Ward and Clinics (Professors Musser, Turner, Debow, Wilson, Jones, and Staff). One section of ten students is assigned for terminal work in the medical wards of the Charity Hospital and the Hutchinson Memorial Clinic daily for about twelve weeks. They take the histories, make the physical examinations of the patients and the necessary laboratory examinations. The cases are then discussed in detail by the instructors, and such phases as prognosis, treatment and complications are dealt with, as well as the results of the several examinations. Whenever applicable, the possible causes of existing disease conditions are analyzed and an attempt is made to estimate the effectiveness of preventive measures had they been applied. The students are held not only for the time assigned by the schedule, but are expected to visit their ward patients daily, to complete their laboratory studies and familiarize themselves thoroughly in their unassigned hours with the literature bearing upon their particular cases. Medical seminars are conducted once a week with the group working in the Hutchinson Memorial Clinic. For a portion of this period groups of students visit the contagious wards with Professor Turner and staff.

Courses at the Touro Infirmary (Professors Wirth, Browne, Findley, Nadler and Turner). One section of ten students is assigned to work at the Touro Infirmary, as clinical clerks, in the medical dispensary and in the wards. This group of students is occupied all day with work at Touro Infirmary.

Roentgenology (Professors Menville, Ané and García). Demonstrations and discussions of the use of the roentgen-ray and radium in diagnosis and therapy are given. The indications, limitations and dangers of these agents are discussed. Where possible, examinations of special cases are made.

Clinical Laboratory Work (Professors Lawson and Staff). Throughout the entire session, each senior student has his own locker and working space for clinical laboratory work in his office in the Hutchinson Memorial in which he keeps his microscope and other apparatus and material with which to carry out the routine laboratory examinations required in connection with the patients studied by him. In addition he has access to special laboratory facilities not provided individually.

It is intended that he shall make practical application of the laboratory methods learned during the previous three years, carrying out all laboratory tests and studies that are practical under the circumstances just as he will do in practice later.
Text-books—Internal Medicine, Its Theory and Practice, Musser. For reference: Practice of Medicine, Tice; Physical Diagnosis, Cabot and Adams; Heart Disease, White; Synopsis of the Diseases of the Heart and Arteries, Herrmann; Treatment of Diabetes Mellitus, Joslin; Nutrition and Diet in Health and Disease, McLeester; Treatment in General Practice, Beckman; Treatment in General Medicine, Helman; Clinical Diagnosis, Pullein; Eye Manifestations of Internal Diseases, Tasman; A Primer of Electrocardiography, Burch and Winsor.

Laboratory of Clinical Medicine—Lecture and Laboratory Guide in Clinical Pathology, Lawson; Biochemistry in Medicine, Cameron and Gilmour; The Practice of Allergy, Vaughan.

PSYCHIATRY (Professor Thompson and Staff). The course begins with psychobiology, which comprehends a series of lectures on the dynamics of the personality functions of 'normal' human beings, and the importance, relation, and role of social and cultural factors. Linked up with this instruction is a personality study, which each student carries out on himself. There are frequent discussions with the class as a whole and with individual students regarding this study.

Psychopathology follows, and comprehends a series of lectures and discussions on the dynamics of 'abnormal' personality functions, the various reaction types, and current nosologic concepts. Along with this, instruction is given in the methods of procedure, mental status examination and specialized tests. Considerable time is devoted to case demonstration and discussion.

Third Year Sections of one-third of the class are met for conferences and seminars on prescribed readings from their guide-books, text-books, current literature, and special assignments on problems related to other fields of medicine. Patients from the Hutchinson Memorial Clinic, the out-patient and in-patient departments of Charity Hospital, are demonstrated, emphasis being placed on diagnosis, differential treatment and management. Special attention is given to personal and sociologic factors at work and to the preventive and therapeutic measures applicable to the case.

Instruction with clinical demonstrations in child psychiatry is also given this year through a liaison between the Child Guidance Center and the Department of Pediatrics. In addition, the third year students are given considerable instruction at the City Hospital for Mental Diseases, where they see psychotic patients.

Fourth Year The student works in the out-patient psychiatric department of the Hutchinson Memorial Clinic and the neuropsychiatric wards of the Charity Hospital where patients are studied in a detailed way under the constant supervision of instructors. Conferences are frequently held at which the psychopathologic and psychotherapeutic processes involved and their management are discussed. Additional instruction is given in the out-patient department of Touro Infirmary. The objective is to teach psychiatry from the standpoint of the working with the average patient. Psychotherapy consideration.

Once a year the class is taken to the East Lonal where an appreciation of the care of chronic cases is gained.

Text-books—Psychobiology and Psychopathology, Watters; Psychiatry, Henderson and Gillespie; Fundamentals of Internal Medicine (Chapter by Strecker).

NEUROLOGY (Professor Thompson and Staff). The course begins with neuroanatomy, and each year with case demonstrations to acquaint the student with neurologic function.

Second Year Instruction begins with lectures on the nervous system, knowing the normal is stressed.

Third Year The student is taken further in procedure, the interpretation of symptoms and neurologic disorders, through case demonstrations, and assigned collateral reading.

Fourth Year Emphasis is put on localization, treatment of neurologic disorders, and in the Charity Hospital and Touro Infirmary through discussion groups. In the out-patient departments of Charity there are additional opportunities in neurologic cases.

DERMATOLOGY (Professor Van Stockum). All students are taught practical work in the wards of the General and in the Hutchinson Memorial Clinic. The sections for this work and assigned for three or four weeks, during which groups of students see cases and undergo quizzing by Professor Van Stockum. Additional instruction is also given in the practical therapeutic care of the skin.

Text-books—Diseases of the Skin and the Ethnic; A Practical Treatise on Diseases of the Skin, Sutton.
teach psychiatry from the standpoint of the average physician working with the average patient. Psychotherapy is given great consideration.

Once a year the class is taken to the East Louisiana State Hospital where an appreciation of the care of chronically ill patients is gained.

Text-books—Psychobiology and Psychopathology, Muncie; Guide to Psychobiology and Psychopathology, Watters; A Text-book of Psychiatry, Henderson and Gillespie; Fundamentals of Psychiatry, Strecker and Ebaugh; Essentials of Psychiatry, Henry; Clinical Psychiatry, Noyes; Internal Medicine, Its Theory and Practice, Musser (Chapter by Strecker).

NEUROLOGY (Professor Thompson and Staff). Through a liaison with neuroanatomy, a special clinic is held each year with case demonstrations; this serves to acquaint the student with neurologic function and dysfunction.

First Year Instruction begins with lectures on clinical examination of the nervous system. The importance of knowing the normal is stressed.

Second Year The student is taken further into methods of procedure, the interpretation of neurologic signs and symptoms, and neurologic diseases, through conferences, seminars, case demonstrations, and assigned collateral reading.

Third Year Emphasis is put on localization, differentiation, and treatment of neurologic disorders in the wards of Charity Hospital and Touro Infirmary through demonstrations and discussion groups. In the out-patient department of Hutchinson Memorial Clinic there are additional opportunities for study of neurologic cases.

DERMATOLOGY (Professor Van Studdiford and Staff). Students are taught practically in the out-patient clinics, in the wards of the Charity Hospital and in the Hutchinson Memorial Clinic. The class is divided into sections for this work and assigned for three periods per week, for four weeks, during which groups of students are required to analyze cases and undergo quizying by Professor Van Studdiford. Instruction is also given in the practical therapeutics of diseases of the skin.

Text-books—Diseases of the Skin and the Eruptive Fevers, Schamberg; A Practical Treatise on Diseases of the Skin, Ormsby; Diseases of the Skin, Sutton.
Department of Obstetrics

Edward Lacy King, Professor. (Head of Department).
Maxwell Edward Lapham, Professor.

Joseph William Douglas, Assistant.

Second Year

During the last trimester of the second year a series of lectures is given which serves as an introduction to the subject of obstetrics. These lectures cover the fundamentals of the subject, and it is felt that they greatly facilitate the work of the succeeding years.

Third Year

The course in obstetrics in the third year consists of didactic lectures, lantern slide exhibits, clinical and laboratory demonstrations and bedside instruction. Three hours a week are devoted to quizzes upon the elements of obstetrics, the physiology of pregnancy, and the conduct of labor. Six hours a week are devoted to the clinical study of cases in the maternity service and outdoor clinics of Charity Hospital, particular stress being laid upon the diagnosis of pregnancy and upon prenatal care, with special reference to the prevention of and the minimizing of the complications of pregnancy and the puerperium. The class is divided into small groups so that each student may secure individual attention from the instructor. Students are assigned to the wards and delivery rooms of Charity Hospital in groups of four for one week of continuous service. During this time they are on duty in the labor and delivery rooms and in the wards. They are detailed to observe constantly the patients in labor, and they assist in the delivery of these patients. They are supervised by the Resident Staff in Obstetrics, who are assistants on the staff of the department.

Fourth Year

In the fourth year the class is divided into four sections, with approximately twenty-four students in each, which sections are assigned, in rotation, to work in obstetrics, gynecology and pediatrics for periods of two months each. During this assignment their entire time is devoted to these subjects. Ward rounds are made in Charity Hospital, where patients presenting various pathologic conditions are studied, and treatment of these cases is carefully followed by the students. Students are required to make deliveries in the Tulane Obstetric Service and are to follow the progress of these patients of convalescence. They are assigned to the discharge of the patients in small groups for periods of five days each. During this period, they assist in deliveries and perform some patients under the supervision of the resident and demonstrate during this period are those of pathology of pregnancy and labor and the different cases.

The various obstetric operations are practiced. Each student is required to prepare a paper or literature on some obstetric topic of special interest.

Note—Each student is required to participate in five deliveries, fifteen of these being required in

Text-books—DeLee; Beck; Stander.

Shelley Kise Gaines, Instructor.
Fay William Benace, Instructor.
Leslie McClure Smith, Instructor.
Paul Bullard Kastrapes, Assistant.
Robert Lansing Norment, Assistant.
Lynn Dunlap Abernathy, Assistant.

Diseases of the Eye

Didactic and clinical instruction in the study of the eye is given during the fourth year. These lectures are correlated with the study of the eye of the eye, the Eye, Ear, Nose and Throat Hospital, and the Eye, Ear, Nose and Throat Hospital, and the Eye, Ear, Nose and Throat Hospital.

External affections of the eyes are demonstrated, as are diseases of the eye of importance to the Differential diagnosis, prophylaxis and treatment.

External affections of the eye are demonstrated in the examination of patients, by alunos for personal examination under supervision. Pathologic features are especially discussed and etc., are used in elucidation.
Second Year
A series of lectures is given as an introduction to the subject of obstetrics, and it is felt that the work of the succeeding years will consist of didactic exhibits, clinical and laboratory demonstrations. Three hours a week are devoted to the fundamentals of the subject, and it is felt that the work of the succeeding years will facilitate the work of the succeeding years.

Third Year
Obstetrics in the third year consists of didactic instruction. Three hours a week are devoted to elements of obstetrics, the physiology of pregnancy and upon prenatal care, with special emphasis on the minimizing of the complications of the puerperium. The class is divided into small sections of the class. The material is used to present practically all diseases of the eye of importance to the future practitioner. Differential diagnosis, prophylaxis and treatment are emphasized.

Fourth Year
The class is divided into four sections, with forty-four students in each, which sections are to work in obstetrics, gynecology and pediatrics. During this assignment their students are required to witness all operative deliveries in the Charity Hospital and to follow the progress of these patients during their periods of convalescence. They are assigned to the delivery rooms in rotation in small groups for periods of five days of continuous service. During this period, they assist in deliveries and as a rule deliver some patients under the supervision of the resident staff. Lectures and demonstrations during this year are devoted largely to the pathology of pregnancy and labor and the resulting complications. The various obstetric operations are practiced upon the manikins.

Each student is required to prepare a paper reviewing the recent literature on some obstetric topic of special interest.

Note—Each student is required to participate in at least twenty-five deliveries, fifteen of these being required in the third year.

Text-books—DeLee; Buck; Stander.

DEPARTMENT OF OBSTETRICS

DISEASES OF THE EYE
Didactic and clinical instruction in diseases of the eye is given during the second, third, and fourth years. These lectures to the second and third year classes are correlated with the study of physical diagnosis and internal medicine. Didactic lectures are given at the Hutchison Memorial and the Richardson Memorial Buildings. For clinical instruction, patients from the out-clinics and wards of the Charity Hospital and the Eye, Ear, Nose and Throat Hospital are brought before sections of the class. The material is used to present practically all diseases of the eye of importance to the future practitioner. Differential diagnosis, prophylaxis and treatment are emphasized.

External affections of the eye are demonstrated and students are trained in the examination of patients, by allotting cases to students for personal examination under supervision. The anatomic and pathologic features are especially discussed and illustrative plates, etc., are used in elucidation.
Instruction in the use of the loupe and the ophthalmoscope and their application in physical diagnosis is begun in the second year.

Moving pictures are used to demonstrate eye operations, and the students are also permitted in the operating room of the Charity Hospital on assigned days.

Special weekly quizzes are arranged for a systematic review of the diseases of the eye covered in didactic lectures and clinical demonstrations. The relationship of diseases of the eye to organic conditions is especially emphasized.

DEPARTMENT OF OTOLARYNGOLOGY
FRANCIS ERNEST LEJEUNE, Professor. (Head of Department).
WILLIAM ALFRED WAGNER, Professor.
CHARLES LAFAYETTE BROWN, Professor.
LUCIAN WHITE ALEXANDER, Assistant Professor.
CARL ELLIS GRANBERRY, Assistant Professor.
JOHN BARR GOOD, Assistant Professor.
Charles Spencer Wood, Instructor.
Clarence H. Steele, Instructor.
Shelley Rice Gaines, Instructor.
Richard McIntosh Street, Instructor.

DISEASES OF THE EAR, NOSE AND THROAT

The students of the fourth year are familiarized with the various instruments necessary for the early recognition of the diseases of the ear, nose, and throat, and this is done in a practical way. To this end students must provide themselves with head mirror, two laryngeal mirrors, tongue depressor, specula for the ear and for the nose.

Practical lectures and demonstrations are given by the various staff members covering all phases of otolaryngology. Students come in personal contact with patients presenting the diseases in which the early diagnosis and proper treatment have become a matter of paramount importance to the general practitioner.

Every effort is made to equip the members of the class so that they are able to recognize the diseases of this department in a manner that gives them conviction; and that can be done only by specially training the eye and the touch.

The teachers of this branch conduct clinical conferences with the examination and treatment of the patient as a part of the routine.

Text-book—Diseases of the Ear, Nose and Throat; Jackson and Morrison, Turner and Ballenger.
the use of the loupe and the ophthalmoscope and in physical diagnosis is begun in the second year. are used to demonstrate eye operations, and the is permitted in the operating room of the Charity good days. quizzes are arranged for a systematic review of eye covered in didactic lectures and clinical demonstration of diseases of the eye to organic condition emphasized.

Wood, Instructor.

Hurst, Instructor.

Sheehan, Instructor.

The students of the fourth year are familiarized with the various instruments necessary for the early recognition of diseases of the ear, nose, and throat, and this is done in the office, operating room, and lecture room. Students must provide themselves with laryngeal mirrors, tongue depressor, specula for the nose, and demonstrations are given by the various staff members of otolaryngology. Students come in contact with patients presenting the diseases in which the staff is interested, and proper treatment have become a matter of paramount importance. Made to equip the members of the class so that they may recognize the diseases of this department in a manner that will make it easy for them to correlate these diseases and treatments with the general practitioner.

The branch conduct clinical conferences with the treatment of the patient as a part of the routine. "Diseases of the Ear, Nose and Throat; Jackson and Ewan, Warner and Ballenger.

**DEPARTMENT OF PATHOLOGY AND BACTERIOLOGY**

Charles Edward Dunlap, Professor. (Head of Department).

Moses Frank Shaffer, Associate Professor.

William Herbert Harris, Assistant Professor.

Andrew Vallois Friedrichs, Assistant Professor.

John Charles Heuston, Assistant Professor.

Samuel Harvey Cohn, Assistant Professor.

Leah Sedman Shaffer, Associate Professor.

Joseph Morton Lubitz, Associate Professor.

William Howard Sternberg, Instructor.

Guillermo Manuel Correa, Instructor.

James Blanding Arey, Instructor.

Stanley Leroy Rea, Instructor.

Maxwell Leonard Littman, Instructor.

Kelsey Charles Milner, Graduate Assistant.

**BACTERIOLOGY** (Professor Shaffer and Staff). The course in medical bacteriology consists of lectures, laboratory exercises and conferences and is designed to give the student an understanding of the role of pathogenic microorganisms in the natural history of infectious diseases. In addition to the consideration of the fundamental principles involved in the isolation, handling, and study of bacteria, fungi and viruses, the specific behavior of the various etiologic agents under conditions of laboratory cultivation and natural spread is examined. The diverse factors in the host's response to the parasite are analyzed, particularly those which may lead to enhanced resistance, and emphasis is laid on the application of such knowledge wherever possible to diagnosis, therapy and prophylaxis. The approach to the subject is intended throughout to integrate, in concert with the teaching of pathology, medicine and surgery, the available data concerning the host-parasite relationships in microbic infection so as to make more clear the disease processes as a whole and a rationale of this management.

**Second Year**

**PATHOLOGY** (Professor Dunlap and Staff). The course in pathology consists of lectures, laboratory work, demonstrations and conferences. The lectures are designed to orient the students' study and to expand and correlate material available in the standard textbooks. New and important contributions to pathology are presented with particular stress on dynamic pathology and pathologic physiology.

The laboratory periods are devoted for the most part to the systematic study of the histologic features of disease processes, but fixed specimens are displayed in the laboratory to assist students in correlating the gross with the microscopic features. Once each week the class meets in the Morgue Amphitheater of Charity Hospital for a demonstration of gross pathological specimens. Whenever possible the pathologic changes in the organs are correlated with the clinical findings in the case records.
The students are encouraged to work independently and to read as widely as time will permit. Conferences, demonstrations and quiz exercises are occasionally substituted for the usual assignments.

During the first part of the year, the basic principles of pathologic processes including tissue injury and repair, inflammation, retrograde processes, tissue responses to specific infectious agents and neoplasms are considered. Subsequently, the common diseases of each organ and anatomic system are studied in greater detail.

Third Year

Gross Pathology. The third year class is divided into sectional groups for the study of gross pathology at the Charity Hospital Morgue. Fresh specimens from recent autopsies are examined and dissected and the lesions are correlated with the clinical history in each case. Emphasis is placed upon the pathogenesis of disease and upon the pathologic background of clinical signs and symptoms.

Surgical Pathology. In conjunction with the Department of Surgery a course in surgical pathology is given to sections of the class throughout the year. Students are assigned surgical patients in the hospital ward. In rotation they present their cases before the entire section. The differential diagnosis and the gross and microscopic pathologic findings are then presented and discussed by the staff members of the Departments of Surgery and Pathology.

Fourth Year

Clinical pathological conferences are held at Charity Hospital at scheduled periods throughout the year. Medical, surgical, pediatric, gynecologic and obstetric cases are presented at these exercises. Members of the clinical staffs in these various specialties discuss the differential diagnosis as based on the patient's history, physical examination and laboratory findings. The gross and microscopic findings of the autopsy are then presented and correlated with clinical findings.

Advanced Pathology. Instruction in advanced pathology is offered to graduate physicians and selected students. In addition to facilities for special study and research, provision is made for the study of special collections of slides and specimens.

Research. The department offers to qualified persons, facilities for investigative work in pathology and bacteriology. This work may be accredited toward advanced degrees in the Graduate School.

Text-books for Second Year Courses: In each course a textbook is required and may be selected from the following: Bacteriology, Topley and Wilson, 3rd edition; Jordan and Burrows, 14th edition; Pathology, Boyd, Moore, Karsner, Mac Callum, Bell, Smith and Gault.

DEPARTMENT OF PEDIATRICS

RALPH VIKTOR PLATOU, Professor. (Head of Department.
MAUD LOOMER, Professor.
GLADYS RICHARD WILLOMSON, Assistant Professor.
EMILE FIDEL NAEF, Assistant Professor.
JULIAN GRAUBARTH, Assistant Professor.
ROY EDWARD DE LA HOUSSAYE, Assistant Professor.
MILTON ELDER KIRKPATRICK, Assistant Professor.
ALLAN JANNEY HILL, Jr., Assistant Professor.
Hippolyte Peter Marks, Instructor.
Joseph David Russ, Instructor.
Edward Louis Levert, Instructor.
Richard Peter Vieth, Instructor.
John Komotani, Assistant.

Second Year

A series of seventeen weekly lectures covering is presented to the entire second year class, in addition for the more intensive teaching program of the special clinics. These lectures include such general subjects as growth, normal behavior patterns, immunology, and diseases, peculiarities of disease in childhood, fluid and electrolyte balance, and therapeutic measures in children.

Third Year

The third year class is divided into six sections. Pediatrics extends through two periods of approximately equal length. For one-half of this time the students are assigned hours in supervised ward work as a clinician and are given intensive training in the diagnosis and treatment of diseases peculiar to children. Throughout the third year the students are given coverage in the field of child psychiatry; a schedule of these lectures is announced in the departmental bulletin board at the beginning of the year. There are weekly staff conferences at which the cases are presented for discussion. Ample opportunity is given for the study of special collections of slides and specimens.

The combined junior and senior class and clinicopathological conferences are conducted by the department of Pathology at regular intervals. Ward assignments furnish the student with first-hand experience with a wide variety of disease processes from birth to twelve years. Patients of all ages are assigned hours in the various clinics, and the student is familiar with the house staff in diagnosis and treatment. Infectious diseases account for most of the cases seen in the wards.

Rounds are held daily, and each student spends a series of assigned hours each week with members of the essential bedside teaching.
DEPARTMENT OF PEDIATRICS

RALPH VICTOR PLATON, Professor. (Head of Department).  
MAURICE LEEPER, Professor.  
GLADYS RICHARDA WILLIAMSON, Assistant Professor.  
EMILIE FIDEL NARE, Assistant Professor.  
JULIAN GRAUMAN, Assistant Professor.  
ROY EDWARD DE LA HOUSSAYE, Assistant Professor.  
MILTON ELDER KIRKPATRICK, Assistant Professor.  
ALLAN JANNEY HILL, Jr., Assistant Professor.  
Hippolyte Peter Marks, Instructor.  
Joseph David Russ, Instructor.  
Edward Louis Levert, Instructor.  
Richard Peter Vieth, Instructor.  
John Kometani, Assistant.  

Second Year

A series of seventeen weekly lectures covering didactic material is presented to the entire second year class, to serve as a foundation for the more intensive teaching program of the next two years. These lectures include such general subjects as growth and development, normal behavior patterns, immunology, nutrition, deficiency diseases, peculiarities of disease in childhood, disturbances in fluid and electrolyte balance, and therapeutic measures useful for children.

Third Year

The third year class is divided into six sections. Work in Pediatrics extends through two periods of approximately six weeks each. For one-half of this time the student spends most of his assigned hours in supervised ward work as a clinical clerk, when he is given intensive training in the diagnosis and management of sick infants and children. Throughout the three month period lectures are given, covering specific diseases of childhood, nutrition, and child psychiatry; a schedule of these lectures is posted on the departmental bulletin board at the beginning of each new section. There are weekly staff conferences at which the students present their cases for discussion. Amphitheatre clinics are arranged for the combined junior and senior classes twice a month, and clinicopathological conferences are conducted with the Department of Pathology at regular intervals.

Ward assignments furnish the student with opportunities for first-hand experience with a wide variety of diseases in children from birth to twelve years. Patients of teaching interest are assigned in rotation by the resident staff, and the student cooperates with the house staff in diagnostic and therapeutic procedures. Contagious diseases account for about one-third of the case assignments.

Rounds are held daily, and each student spends at least two designated hours each week with members of the attending staff for essential bedside teaching.
During this clerkship each student prepares a thesis dealing with some particular phase of clinical pediatrics which he has encountered. Quiz hours are held once weekly covering lectures and assigned reading; written reports on specific assigned subjects are required.

Opportunity for registration in a number of elective courses and for individual research problems is offered to a selected number of junior and senior students.

**Fourth Year**

The major portion of the student's time in the fourth year is spent in the out-patient departments of the School and Charity Hospital. Here he is encouraged to conduct himself as a physician in private practice, the attending staff acting in a supervisory capacity as consultants. Students have fully equipped offices assigned to them during the four-week clerkship. The class is divided into eight small sections, so that there is opportunity for close individual instruction.

Weekly conferences are held with members of the pediatric and obstetric staffs, dealing with mutual problems in maternal and infant welfare.

Each week there are regularly scheduled conferences and discussions covering assigned reading lists, presentation of theses prepared by the students, and review of particular problems as they arise in clinic practice.

During each academic year, the Department presents ten lectures on general Pediatric subjects to the combined junior and senior classes.

---

**DEPARTMENT OF PHARMACOLOGY**

RALPH GRATTON SMITH, Professor. (Head of Department).

FOSTER NEWTON MARTIN, Jr., Assistant Professor.

Rudolph Koster, Instructor.

---

**Second Year**

The object of instruction in the Department of Pharmacology is to teach the student a certain amount of factual information regarding the action of the more important drugs and the more common types of poisons, and at the same time to emphasize the point of view that drugs act by modification of existing physiological processes. The actions of these drugs which are utilized clinically are discussed in particular in order to lay a rational basis for drug therapy. No attempt, however, is made to teach clinic in the belief that this is within the province of those applying therapeutic procedures to individual patients.

The satisfactory completion of the first three years is required of all medical students.

**PHARMACOLOGY** (Professor Smith and Student course in which the more are presented systematically. Three-hour period each week.)

**PHARMACODYNAMICS** (Professor Martin laboratory course in student experiments and staff demonstrations, various modifications of physiological processes are studied. Twenty three-hour periods.)

**MATERIA MEDICA**

**PRESCRIPTION WRITING AND TOXICOLOGY** (Professor Smith laboratory and class in which the chief substances used as drugs are studied. Demonstration in toxicology are offered. These briefly. Drills in prescription writing are conducted; simple prescriptions are compounded. Laboratory demonstrations in toxicology are offered. These are followed by experiments designed to illustrate the more important toxic agents. One three-hour period for twelve weeks.)

**ELECTIVE** An elective course in pharmacology hour journal club and discussion of topics followed by experiments designed to illustrate certain groups of drugs. In such experiments have greater facilities than is possible in large classes will be given to some of the newer drugs.

Prerequisite: The required Medical courses.

One three-hour period weekly during the second half year.

**GRADUATE** In addition to the courses required students, work in experimental pharmacology is carried on by those properly qualified accredited toward advanced degrees. Further data in the bulletin of the Graduate School.

DEPARTMENT OF PHARMACOLOGY

Professor. (Head of Department).
Assistant Professor.
Instructor.

Second Year
af instruction in the Department of Pharmacology is
student a certain amount of factual information re-
the more important drugs and the more com-
plications, and at the same time to emphasize the point
of drugs by modification of existing physiological
ctions of those drugs which are utilized clinically
particular in order to lay a rational basis for drug
therapy. No attempt, however, is made to teach clinical therapeutics
in the belief that this is within the province of those who are actually
applying therapeutic procedures to individual patients.

The satisfactory completion of the first three courses listed below
is required of all medical students.

PHARMACOLOGY (Professor Smith and Staff). A lecture
course in which the more important drugs
are presented systematically. Three one-hour periods for twenty-
seven weeks.

PHARMACODYNAMICS (Professor Martin and Staff). A
laboratory course in which, by selected
student experiments and staff demonstrations, a number of the
various modifications of physiological processes induced by drugs
are studied. Twenty three-hour periods.

MATERIA MEDICA

AND TOXICOLOGY

PRESCRIPTION WRITING

AND TOXICOLOGY

(Professor Smith and Staff). A laboratory and conference course
in which the chief groups of sub-
stances used as drugs are examined
and the effects of some
of the more important toxic agents. One three-hour period weekly
for twelve weeks.

ELECTIVE An elective course in pharmacology consisting of one
hour journal club and discussion groups on selected
topics followed by experiments designed to illustrate the action of
certain groups of drugs. In such experiments the student will
have greater facilities than is possible in large classes and attention
will be given to some of the newer drugs.

Prerequisite: The required Medical courses in pharmacology.
One three-hour period weekly during the second half of the academic
year.

GRADUATE In addition to the courses required of medical stu-
dents, work in experimental pharmacology may be
laboratory in which the chief groups of sub-
stances used as drugs are examined
and the effects of some
of the more important toxic agents. One three-hour period weekly
for twelve weeks.

TEXT-BOOKS—Goodman and Gilman, Pharmacological Basis of
Therapeutics. Wright, Manual of Prescription Writing and Medical
PHYSIOLOGY This course is given during the second part of the first year. Its object is to present a thorough discussion of the functional organization of the body and its parts and, as far as possible, to explain physiological mechanisms in accordance with established laws of fundamental science. Particular attention is devoted to those functions which are commonly deranged in disease.

The first three weeks of the course is devoted to a study of blood and is taught in collaboration with the Department of Biochemistry. The next seventeen weeks (five afternoons each week) are used to study the heart and circulation, respiration, digestion, temperature regulation, urinary excretion and the endocrine and nervous systems. The daily program usually consists of a lecture followed by a laboratory period or a quiz conference, there being two laboratory periods and two quiz conferences each week. An advanced course is offered during the last two weeks of the school year to a limited number of students who have achieved superior standings during the first year. The remainder of the class utilizes this period for correlation and review of the work of the year.

Text-books—Each student is required to have a textbook which may be selected from the following.

GRADUATE COURSES The Graduate School catalogue may be consulted for descriptions of special advanced courses and provision for research in the Department.

DEPARTMENT OF PREVENTIVE MEDICINE

WILLIAM ANTHONY SODEMAN, Professor. (Head of Department).
RALPH HEINRICH HEEREN, Associate Professor.
Vincent Joseph DePaul Derbes, Instructor.
Jack L. Gilkey, Instructor.

Preventive Medicine in this course embraces the principles and practices in the prevention of disease as a component of all branches of medical service.
This course is given during the second part of the first year. Its object is to present a thorough functional organization of the body and its parts possible, to explain physiological mechanisms in as-established laws of fundamental science. Particularly tied to these functions which are commonly deranged.

In so far as objective

Clinic.

Because prevention is the ultimate of medical attainment, the course of study reviews the agents of disease, the methods by which they affect man, and the means by which these agents may be controlled or man made less susceptible to them.

Second Year

In the second year a course in statistical methods is given through a series of general lectures and laboratory exercises. Preventive Medicine directs this teaching with the hope that the objective methods of measurement in medicine may be found to be of value to the student in all of his studies.

The second year students are given a course in epidemiology consisting of general lectures and laboratory exercises. Epidemiology, as so presented, is given in its broadest terms, that is, a study of the agent of disease and the environmental factors responsible for their spread and acquisition by man.

Third Year

In the third year a series of conferences is given to outline for the student the practical approach to the problems of prevention of disease. These conferences include a series of lectures on industrial medicine, nutrition, immunization, tuberculosis and syphilis control, relationship of the patient to the social sciences, and dental hygiene and general public health measures. This series of discussions lays the groundwork for the clinical work in the fourth year.

Fourth Year

The fourth year students are assigned by sections for one month to the Department of Preventive Medicine, during which time they receive intensive instruction in particular phases of epidemiology and specific preventive measures. The teaching of the varied aspects of preventive practice is carried out largely through clinical, ward rounds. In the clinic of the Department of Preventive Medicine, students receive and examine patients admitted to the department for health examination, certification for food handlers, admission to camps, schools, etc. In addition to these patients a certain number are admitted who are members of the families of patients in the wards of Charity Hospital or the Hutchinson Memorial Clinic. In so far as possible, these family groups will constitute the unit of study by the department and will serve in the teaching and demonstration of the responsibilities and opportunities of the private practitioner in the personal, family, and social welfare of his patients. This will involve domiciliary visits to the homes of these families, a survey of the home conditions and the following through of the members of the family into their school, industrial and social environments.

The department participates in the Health Service to students to the extent of being responsible for the examination and testing of all medical students from the time of their admission in the first year of studies to their graduation. First year students become bona fide patients of the Hutchinson Memorial Clinic and so expose themselves to the methods and procedures of clinic care this early in their experience. Senior medical students participate in the examination and care of the first year students.

Junior year: New York Academy of Medicine, Preventive Medicine in Modern Practice; Perkins, Cause and Prevention of Disease; Gafafer, Manual of Industrial Hygiene.

Senior year: Dunham, Military Preventive Medicine; Gay and Associates, Agents of Disease and Host Resistance.

SURGERY The subject of surgery includes courses in principles of surgery, minor surgery, clinical surgery, surgical pathology, orthopedic surgery, operative surgery and genito-urinary surgery.

Second Year

Introduction to Surgery. In the second year a didactic course is given by Prof. Ochsner, at the Richardson Memorial. The purpose of this course is to correlate the pre-clinical sciences and clinical surgery, so that the student may be better able to understand the practical application of the fundamental sciences. Considerable attention is paid to sterilization, asepsis and antisepsis. The local as well as the constitutional effects of trauma are considered. The various types of wounds, their character and characteristic signs, as well as their therapy, are discussed. The constitutional effects of trauma, hemorrhage, shock, and asphyxia are considered in detail. The reaction of the organism to infection, both local and constitutional, as well as the specific types of inflammation, are taken up. Lesions of the vascular system and blood transfusion are discussed, as well as general considerations of surgical pathology, especially in regard to tumors, both benign and malignant. The various types of chronic ulceration on cutaneous surfaces are considered with their differentiating points.

Third Year

General Surgery. The major portion of teaching in the third year is carried on in the hospital wards. Each section of students is divided into four groups of eight or ten students, each group being assigned to individual wards. These wards are in charge of Professors Ochsner, Gage, DeBakey, Storck, Penick, Dixon, and Lyons. Each patient admitted to the ward is assigned to a student who takes a complete history, makes a physical examination, and does the required laboratory work. He is required to make his differential diagnoses as well as a final diagnosis. At operations the particular student who has worked up the case goes to the operating room and observes the pathology, as well as the operative technic in the particular case. Every morning, from 9:00 to 10:00, surgical ward rounds are held in one of the ten surgical wards, at which an entire section of approximately eighteen students is present. Cases are presented by the students who are responsible for the working up of these cases.

Didactic Lectures. The systematic course of lectures and demonstrations in general surgery and the principles of surgery is given in the Hutchinson Memorial by Professor Ochsner and other members of the staff, alternating with the Department of Medicine and other departments so that a co-ordinated course of medicine and surgery is given to the students. Quizzes based on the reading of authoritative original articles are held throughout the session. The class is divided into sections for quiz work. Written examinations are also given. Diagnostic clinics are held in the Delgado Amphitheater, Charity Hospital on Thursdays and Saturdays by different members of the
SURGICAL ANATOMY AND SURGICAL PATHOLOGY

The course in surgical anatomy consists of demonstrations upon the cadaver of the fundamental anatomy of the organs and regions in which the more common operative procedures are performed. Emphasis is placed upon the application of anatomic facts to the rational basis and the underlying principles of the operations. A recitation on the subject previously assigned with elaboration by the instructor precedes each demonstration.

The course in surgical pathology is given in conjunction with the Department of Pathology and consists of demonstrations of fresh specimens from the operating rooms of the Charity Hospital, and in the presentation of microscopic pathologic characteristics which establish the diagnosis. Preceding each demonstration the clinical manifestations of the case from which the specimen was removed are considered from a diagnostic, prognostic and therapeutic standpoint.

Fourth Year

During the fourth year the students work mostly in the clinic and out-patient department under the direction of Professor Ochsner and staff. The section is divided into small groups and assigned to the Hutchinson Memorial Clinic and also the Charity Hospital Clinic. In these clinics the students see the ambulatory patient and the earlier and less advanced surgical lesions. Cases are assigned to the students for diagnosis and treatment. In the Hutchinson Memorial Clinic, students have individual offices and see patients entirely by appointment on a rotating service with each department concerned with the teaching of students. Each patient is completely worked up by the student, the instructors acting as consultants. One section of students is assigned to the fracture wards and out-patient service under the direction of Professor Caldwell and another section is assigned to the urology wards and out-patient service under the direction of Professor Pratt. Students are also assigned to the Accident Room, where they observe emergency cases and their treatment. Quiz conferences and ward rounds with students play a prominent part in the out-patient clinic. The outpatient clinics are held primarily in the morning. The afternoons are devoted to informal discussions, ward rounds, and to special clinics. One afternoon is spent in the vascular clinic at the Charity Hospital and one is spent in the tumor clinic, which is participated in by the Departments of Surgery, Pathology, Roentgenology, and other departments. Rounds on burns and plastic surgery are conducted by Professor Owens and Staff, on neurologic injuries and neurosurgery by Professor Echols and Staff, and on surgical infections by Professor Lyons.

Diagnostic Clinic. On Thursdays and Saturdays diagnostic clinics are conducted in the Delgado Amphitheater, Charity Hospital, by Professors Ochsner, Gage, DeBakey, Penick, Dixon, and another section of students which are of practical interest to the students are assigned to a patient, and they then make the patient in the amphitheater. A discussion of the case is presented by the student under the direction of the instructor. The student gains experience in presenting cases before learning to conduct himself under difficulty.

Surgical Seminar. Once a week a surgical seminar is presented by Professor Ochsner, at which time students present cases they have prepared on some special subject. In preparation the students consult the recent literature and become familiar with the surgical and medical periodicals. In this way they learn the art of presenting articles, as well as presenting them before a group.

Anesthesia. Individual instruction and demonstration of general anesthesia are given every Tuesday before class sections assigned to this division.

Text-books—Second Year: Blalock, Principles of Shock and Other Problems; Cole and Fueston, First Year: Ochsner and Mahorner, Varicose Veins. Surgical Diagnosis; Graham. Surgical Pathology: Boyd; Root's Pathology of Surgical Diseases.

Fourth Year: Minor Surgery: Christopher; Bland, the Hand; Cope, Early Diagnosis in Acute Clinical Research in Acute Abdominal Disease. Fracture: Nelson's Loose-Leaf Surgery; Lewis, Fracture and Joint Operation Surgery, Horsley and Bigger.

BONE AND JOINT SURGERY

ORTHOPEDICS

Fourth Year

(School of Medicine, Tulane University)

Lectures illustrated with motion pictures cover the most important phases of fracture treatment and of orthopedic conditions. Excellent material for clinical work in the diagnosis and treatment of diseases and injuries and joints, including fractures, and of the neuromuscular conditions available in the Charity Hospital ward and clinic are presented in the Hutchinson Memorial Clinic. Practical demonstrations of traction, splinting, and plaster work are given, and the students are taken to the ambulatory cases of postural and static foot disorders together with that of acquired and congenital deformities.

Text-books—Fractures and Dislocations, Watson-Jones and Conwell; Magnuson; Caldwell; Campbell, Steindler, Whitman, Gormley.

URBAN MEDICINE (Professors Pratt and Burns, and Menville). The course in urban medicine is broadest possible range of study in urban medicine, members of the staff cover etiology, symptoms, etc.
A T A N O M Y

The course in surgical anatomy consists of demonstrations upon the cadaver of the fundamental anatomy of the organs and regions in which the more common disease processes occur. Emphasis is placed upon the anatomic facts to the rational basis and the underlying pathologic factors in the cases presented. A recitation on the subject precedes each demonstration, and a surgical pathology is given in conjunction with the study of Pathology and consists of demonstrations of the most important phases of microscopic pathologic characteristics of the disease. Proceeding each demonstration the student is required to enter from a diagnostic, prognostic and therapeutic point of view the surgical pathology and pathologic chemistry of the case which the specimen represents.

F O U R T H Y E A R

Fourth year: The students work most in the clinic and in the operating room under the direction of Professor Ochsner. The section is divided into small groups and in the Memorial Clinic and also the Charity Hospital. In these clinics the students see the ambulatory and the hospital cases of the more advanced surgical lesions. Cases are presented which are of practical interest to the students. The students are assigned to a patient, and they, themselves, present the patient in the amphitheater. A discussion of the case is given by the student under the direction of the instructor. In this way the student gains experience in presenting cases before a group, and learns to conduct himself under difficulty.

Surgical Seminar. Once a week a surgical seminar is conducted by Professor Ochsner, at which time students present a thesis which they have prepared on some special subject. In preparing this thesis the students consult the recent literature and become acquainted with the surgical and medical periodicals. In this way training in writing articles, as well as presenting them before a group, is obtained.

Anesthesia. Individual instruction and demonstration in methods of general anesthesia are given every Tuesday and Thursday before class sections assigned to this division.

Text-books—Second Year: Blalock, Principles of Surgical Care, Shock and Other Problems; Cole and Puestow, First Aid.

Third Year: Christopherson, Babcock; Homan; Cole and Elman; Ochsner and Mahorner, Varicose Veins. Surgical Diagnosis: DeQuervain; Graham. Surgical Pathology: Boyd; Rest's Pathological Physiology of Surgical Diseases.

Fourth Year: Minor Surgery: Christopherson, Kanavel, Infections of the Hand; Cope, Early Diagnosis of the Acute Abdomen; Cope, Clinical Researches in Acute Abdominal Diseases; Nelson's Loose-Leaf Surgery; Lewis, Practice of Surgery; Operative Surgery, Horelsey and Biggers.

BONE AND JOINT SURGERY

ORTHOPEDICS

Fourth Year

(Professor Caldwell and Drs. Wickstrom, Altenberg, Berisson, and Teitelbaum). Lectures illustrated with slides and moving pictures cover the most important phases of fracture treatment and the management of orthopedic conditions. Excellent material for clinical instruction in the diagnosis and treatment of diseases and injuries of the bones and joints, including fractures, and of the neuromuscular system is available in the Memorial Clinic and also in the Charity Hospital. Practical demonstrations in the principles of traction, splinting, and plaster work are given. The care of ambulatory cases of postural and static foot disorders is shown to the students, and the possible causes of existing disease are discussed. The students consult the recent literature and become acquainted with the surgical and medical periodicals. In this way training in writing articles, as well as presenting them before a group, is obtained.

Anesthesia. Individual instruction and demonstration in methods of general anesthesia are given every Tuesday and Thursday before class sections assigned to this division.

Text-books—Second Year: Blalock, Principles of Surgical Care, Shock and Other Problems; Cole and Puestow, First Aid.

Third Year: Christopherson, Babcock; Homan; Cole and Elman; Ochsner and Mahorner, Varicose Veins. Surgical Diagnosis: DeQuervain; Graham. Surgical Pathology: Boyd; Rest's Pathological Physiology of Surgical Diseases.

Fourth Year: Minor Surgery: Christopherson, Kanavel, Infections of the Hand; Cope, Early Diagnosis of the Acute Abdomen; Cope, Clinical Researches in Acute Abdominal Diseases; Nelson's Loose-Leaf Surgery; Lewis, Practice of Surgery; Operative Surgery, Horelsey and Biggers.

BONE AND JOINT SURGERY

ORTHOPEDICS

Fourth Year

(Professor Caldwell and Drs. Wickstrom, Altenberg, Berisson, and Teitelbaum). Lectures illustrated with slides and moving pictures cover the most important phases of fracture treatment and the management of orthopedic conditions. Excellent material for clinical instruction in the diagnosis and treatment of diseases and injuries of the bones and joints, including fractures, and of the neuromuscular system is available in the Memorial Clinic and also in the Charity Hospital. Practical demonstrations in the principles of traction, splinting, and plaster work are given. The care of ambulatory cases of postural and static foot disorders is shown to the students, and the possible causes of existing disease are discussed. The students consult the recent literature and become acquainted with the surgical and medical periodicals. In this way training in writing articles, as well as presenting them before a group, is obtained.

Surgical Seminar. Once a week a surgical seminar is conducted by Professor Ochsner, at which time students present a thesis which they have prepared on some special subject. In preparing this thesis the students consult the recent literature and become acquainted with the surgical and medical periodicals. In this way training in writing articles, as well as presenting them before a group, is obtained.

Anesthesia. Individual instruction and demonstration in methods of general anesthesia are given every Tuesday and Thursday before class sections assigned to this division.

Fourth Year

(Professor Caldwell and Drs. Wickstrom, Altenberg, Berisson, and Teitelbaum). Lectures illustrated with slides and moving pictures cover the most important phases of fracture treatment and the management of orthopedic conditions. Excellent material for clinical instruction in the diagnosis and treatment of diseases and injuries of the bones and joints, including fractures, and of the neuromuscular system is available in the Memorial Clinic and also in the Charity Hospital. Practical demonstrations in the principles of traction, splinting, and plaster work are given. The care of ambulatory cases of postural and static foot disorders is shown to the students, and the possible causes of existing disease are discussed. The students consult the recent literature and become acquainted with the surgical and medical periodicals. In this way training in writing articles, as well as presenting them before a group, is obtained.
diagnosis, and treatment of the more common urological and venereal diseases. Clinical experience is obtained by actual care of patients in the Charity Hospital outpatient clinic. It is in these outpatient clinics that the student writes histories, makes physical examinations, microscopic examinations, and consults with the staff as to diagnosis and treatment of the case. Urological x-rays are studied. Special laboratory tests are secured. Seminars are held once a week at which papers on urological diseases are presented by the students. It is in these outpatient clinics that the student writes histories, makes physical examinations, microscopic examinations, and consults with the staff as to diagnosis and treatment of the case.

Textbooks—Urology; Pelouze, Cabot, Lowsly & Kerwin, Dodson.

Third Year

PARASITOLOGY The required work consists of practical lectures, quizzes, laboratory problems and clinical study on the animal parasites of the human body encountered primarily in patients in the Southern United States. The student is provided with basic information on the etiology, epidemiology and pathogenesis of the disease processes produced by the intestinal protozoa, the malaria parasites, the intestinal helminths and the arthropod agents and vectors of disease, together with the symptoms they evoke. Fundamental procedures in treatment are outlined. Practical control measures are especially emphasized. Essentially half of this schedule will be in connection with patients in the Charity Hospital.

Fourth Year

TROPICAL MEDICINE The required course for fourth-year students consists of the demonstration and study of endemic and exotic diseases available in the Charity Hospital, Hutchinson Memorial Clinic and other medical institutions in New Orleans. In this work there will be close cooperation with the Department of Preventive Medicine.

ELECTIVE COURSE

This course is designed to supplement the regular junior and senior years by presenting in laboratory conferences and clinical demonstrations (when available) diseases which are more prevalent in Tropical than in the United States. These include: cholera and other leishmaniasis, African sleeping sickness, malaria, schistosomiasis and other trematode infestation of the liver, the relapsing fevers, Weil's disease, and tropical mycoses.

Medical students who have satisfactorily completed the junior course may register for this elective, which will be given on Wednesday afternoons from one to four p.m.

For the academic year 1946-1947 senior students will work only during the first or second six-week terms. Thereafter it will be offered for three-month periods only to junior students who have completed the junior course in Tropical Medicine. This course will probably be given continuously in the academic year, in three three-month blocks, all seniors and to those juniors who have completed the junior course.

GRADUATE AND POSTGRADUATE WORK

This Department offers courses for physicians interested in tropical diseases and who desire to pursue advanced study. Registration in the Graduate School of the University of New Orleans for the degree of Master of Science or Doctor of Medicine is required. A five-month postgraduate course in Tropical Medical Parasitology is offered by the Department of Tropical Medicine from January through May, for physicians who plan to practice in tropical countries. A certificate is given to those who have satisfactorily completed the work. Applications should be made to: The Director, Division of Tropical Medicine, New Orleans 13, La.

Textbooks—Parasitology: Craig and Faust, 4th Ed. (1945); Tropical Medicine: Mackinnon, Manual of Tropical Diseases; Strong, Stitt's Diagnosis and Treatment of Tropical Diseases; Ash and Ochsenrein, Tropical Diseases.

ELECTIVES

Elective courses for Sophomore, Junior and Senior years will be offered on Wednesday afternoons, beginning October 11. These courses will be given at the discretion of the Director of the Department of Tropical Medicine and will be open only to students who have completed the regular junior course in Tropical Medicine and have the approval of the Dean of the School of Medicine.
The more common urological and venereal disease is obtained by actual care of patients in the out-patient clinic. It is in these out-patient cases histories, makes physical examinations, and consults with the staff as to diagnosis of the case. Urological x-rays are studied. Special seminars are held once a week at which student diseases are presented by the students. For the preparation of these papers. For hospitalized cases sixty beds, male and female, afford ample material for this type of work.

- E.A. 3. OF TROPICAL MEDICINE
- Professor. (Acting Head of Department)
- Professor.
- Assistant Professor.
- Walker, Assistant Professor.
- Bresler, Assistant Professor.
- Kagi, Associate.
- Chamber D., Assistant.
- Quay, Jr., Assistant.

Third Year

The required work consists of practical lectures, quizzes, laboratory problems and on the animal parasites of the human body especially in patients in the Southern United States. The required course for fourth-year students consists of the demonstration and study of endemic and exotic diseases available in the Charity Hospital, General Clinic and other medical institutions in New Orleans. There will be a close cooperation with the Preventive Medicine.

ELECTIVE COURSE

This course is designed to supplement the required work of the junior and senior years by presenting in laboratory, quizzes, informal conferences and clinical demonstrations (whenever available) the diseases which are more prevalent in Tropical and Oriental countries than in the United States. These include: cholera, plague, kala-azar and other leishmaniases, African sleeping sickness, Chagas' disease, malaria, schistosomiasis, and other trematode infections, the typhus group of fevers, the relapsing fevers, Weil's disease, yaws, pinta and tropical mycoses.

Medical students who have satisfactorily completed the required junior course may register for this elective, which will be scheduled on Wednesday afternoons from one to four p.m.

For the academic year 1946-1947 senior students may take this work only during the first or second six-week block of the year. Thereafter it will be offered for three-months' periods and will be open only to junior students who have completed the prerequisite. In 1947-1948 this course will probably be given three times during the academic year, in three three-month blocks. It will be open to all seniors and to those juniors who have completed the required junior course.

GRADUATE AND POSTGRADUATE WORK

This Department provides opportunities for physicians, who are particularly interested in parasitic and tropical diseases and who desire to pursue advanced studies and research, to register in the Graduate School of the University towards the degree of Master of Science or Doctor of Philosophy.

A five-months' postgraduate course in Tropical Medicine and Medical Parasitology is offered by the Department once each year, January through May, for physicians who plan to practice in tropical and subtropical countries. A certificate is given to those who have satisfactorily completed the work. Application for this course should be made to: The Director, Division of Graduate Medicine, 1430 Tulane Avenue, New Orleans 13, La.

Text-books—Parasitology: Craig and Faust, Clinical Parasitology, 4th Ed. (1945); Tropical Medicine: Mackie, Hunter and Worth, Manual of Tropical Diseases; Strong, Stitt's Diagnosis, Prevention and Treatment of Tropical Diseases; Ash and Spitz, Pathology of Tropical Diseases.

ELECTIVES

Elective courses for Sophomore, Junior and Senior students in several of the departments will be offered in the 1946-47 session on Wednesday afternoons, beginning October 1, 1946. The elective courses to be given will be posted at the beginning of the session when students can select the courses desired, subject to selection and approval by the departments.

81 —— 488
GRADUATES OF AUGUST 14, 1945

At the One Hundred and Thirteenth Commencement held Tuesday, August 14, 1945, degrees were conferred on 136 graduates.

Doctor of Medicine

Gilbert Ernest Adams, P. O. Box 1614, San Jose, Costa Rica
Fernando Alvarado-Piza 78 Fernandez Sanoas Ave., San Juan, Puerto Rico
Luis Alvarez, Jr. (B. S.)
Herman Weatherby Anderson, Jr. 516 S. Hayes St., Carbondale, Ill.
*John Jacob Buehr, Jr. (B. S.) 2633 D’Abadie St., New Orleans, La.
*Thomas Gaus Baffes (B. S.) 2607 Cleveland Ave., New Orleans, La.
Hiram Watkins Kostinayer Batson (B. S.) 5926 Perrier St., New Orleans, La.

Samuel Baum (B. S.) 475 Gregory Ave., Passaic, N. J.
Robert Henry Benboe 1117 Ursuline Ave., Bryan, Tex.
*Gerald Sanders Berenson (B. S.)
James Flomin Biggart, Jr. (B. S.) Route #1, Buena Vista, Va.
*Bevery Blood (B. S., M. S.) 415 Chester St., Alexandria, La.
Arthur William Bohms, Jr. (B. S.) 9508 Freret St., New Orleans, La.
Simone Brocato (B.S.)
Claude Lamar Brown, Jr. (B. S.)
James Brooks Brown (B. S.) Route #5, Montgomery 7, Ala.
Nelson Leon Brown (B. S.) 1402 Black Lawn, Mobile, Ala.
Anthony Joseph Bruno (B. S.)
Robert Torrance Cale (B. S.) 4130 2nd St., Birmingham, Ala.
Joseph Davidson Calhoun (B. S.) Rayville, La.
Richard Devore Carter (B. S.) Jamestown, Ala.
Alvin Cohen (B. S.) 3241 Calhoun St., New Orleans, La.
Herbert Cohen (B. S.) 1544 East 3rd St., Brooklyn, N. Y.
Lawrence Joseph Cohen (B. S.) 2900 Capital Ave., Cheyenne, Wyo.
Henry Thomas Cook (B. S.) 2323 Gen. Taylor St., New Orleans, La.

Lane Butler Cooke, Jr. 2122 Scott St., Little Rock, Ark.
Frank Mortimer Covert, III 1602 Pease Road, Austin, Tex.
John Austin Craig (B. A.) 821 Taylor Ave., Avalon, Pa.
Egbert S. Crossett (B. S.)
Lear William Dane 3629 Baronne St., New Orleans, La.
Lanford Harold DeGeneres (B. S.) 610 Erie St., Shreveport, La.
Elbert Jackson Dickert (B. A.) 1527 Boundary St., Newberry, S. C.
Norman DiMaso (B. S.) 1800 East 9th Street, Brooklyn, N. Y.

Henry Moseley Dismukes (B. S.) 1905 Old Shell Road, Mobile, Ala.

Thomas Claude Donald, Jr. (B. A.)
Ralph Aaron Down, Jr. (B. S.) 1219 Olive St.
Jules St. Martin Dupont 1916 Esplanade Ave.
Robert Dreher Dyer (B. A.)
Mitchell Edie (B. S.)
Albert John Ehler 1101 Laurel Ave.
John Dur Elmore (B. A.)
Jack Flowers (B. A.)
Josh Jennings Keisinger 3115 Austin
Alton Norman Evans (B. S.)
Richard Alan Faust (B. S.) 7444 St. Charles Ave.
Jack Wilson Flowers (B. S.)
Jerome Bernard Ferman (B. S.) 839A 46th St.
Paul Scott Foster (B. S.) 207 Hart
Jack Frankel (B. S.)
*R. G. Donald Franklin (B. S.)

Benjamin Thomas Galloway, Jr. 1166 3rd St., S.
Joseph Eggleston Gardner (B. A.)

Hale Giffen (B. A.)
Harold Glick (B. S.) 2136 Wallace Ave., Bronx
Irvin Arlin Goldman (B. S.) 422 Richmond St.
Seymour Goodstein (B. S.) 1745 President St., N. B.
Stephen Harry Graham (B. S.)
Marvin Green (B. S.) 1149 Putnam Ave., Brookline
Frank George Gruch (B. S.) 235 Cedar St.
Robert Otto Harris, III (B. A.) 306 Michigan Ave.
Lamuel Davis Haughton, Jr. 701 Southern St., H.
Carroll Vincent Herron 329 Schoonmaker Ave.
Arthur Duke Hertberg (B. S.)
Eugene Hesdorffer (B. S.)
James Edward Holmes 807 Gulf St., S.
Samerfilh Benson Hutton, Jr. (B. S.)

Clarence Alphonse Imboden, Jr. (B. S.)

Dewitt Bass James
Marion Lee Jarrell (B. S.) 9459 Mary St.
Rafael Angel Jimenez (B. S.)

John Jofko (B. S.) 426 Van Horn Ave.
Lew Ernest Johns, Jr. (B. S.)
Owen Brattain Johnson
*Roderick Clifton Jung (B. S.)
Berton Katz (B. S.)
Wallace Korn (B. S.) 30 Ocean Parkway.
Robert Columbus Lancaster (B. A.)
Dudley Leibowitz (B. S.)
Melvin Howard Levin (B. S.)
Walter Edmond Levy, Jr. (B. S.)

THE TULANE UNIVERSITY OF LOUISIANA
New Orleans 15, La.

BUFFS CARROLLTON HARRIS, A. B., LL. B., JURIS. D., LL. D.,
President of the University

The University, in all its departments, is located in New Orleans. There are the following colleges, housed in thirty-nine buildings, with extensive laboratories and libraries.

THE COLLEGE OF ARTS AND SCIENCES for men offers courses leading to the degree of Bachelor of Arts, Bachelor of Science and Bachelor of Education in Physical Education. Pre-medical and pre-medical courses are offered, and may be combined with subsequent professional courses for the degree of Bachelor of Arts and Bachelor of Science, respectively. Special courses are provided in Journalism, to which women who have attained Junior standing are admitted.

THE H. SOPHIE NEWCOMB MEMORIAL COLLEGE FOR WOMEN offers full courses in Arts and Sciences, Fine Arts, and Music. Modern dormitories provide comfortable accommodations.

(The following departments are co-educational)

THE COLLEGE OF ENGINEERING offers courses leading to the degree of Bachelor of Engineering in the Schools of Chemical Engineering, Civil Engineering, Electrical Engineering, and Mechanical Engineering; School of Architecture courses lead to the degree of Bachelor of Science in Architecture in four years and to the degree of Bachelor of Architecture in five years.

THE COLLEGE OF BUSINESS AND BUSINESS ADMINISTRATION offers substantial professional training to prepare students for business careers. The day course leads to the degree of Bachelor of Business Administration and the evening course to the degree of Bachelor of Business Administration. Three years of undergraduate work may be combined with the first year in the College of Law for the degree of Bachelor of Business Administration.

UNIVERSITY COLLEGE, the evening division of Tulane University, offers undergraduate courses in Arts, Sciences, and Business leading to the degree of Bachelor of Arts and Bachelor of Commercial Science. The work is arranged primarily for the convenience of students who, because of other employment, are unable to attend classes except in the afternoon and at night.

THE SCHOOL OF SOCIAL WORK offers professional courses leading to the degree of Master of Social Work. These courses are open to graduates of approved colleges.

THE COLLEGE OF LAW offers courses in both civil and common law leading to the degree of Bachelor of Laws and the graduate degrees of Master of Civil Law and Master of Laws.

THE SCHOOL OF MEDICINE offers the regular four-year course leading to the degree of Doctor of Medicine and, in graduate physiology, courses leading to advanced degrees, fellowships and long courses not leading to advanced degrees, short intensive courses in special fields, review courses, and external teaching.

THE GRADUATE SCHOOL, open to graduates of approved colleges, offers courses leading to the degree of Master of Arts, Master of Science, advanced degrees in Architecture and Engineering, and, in certain departments, Doctor of Philosophy.

THE MIDDLE AMERICAN RESEARCH INSTITUTE conducts research in Mexico, Central America and the West Indies. It maintains a library and museum and a program of visual education. The work of the Institute is chiefly concerned with the culture of the Ancient Maya.

THE SUMMER SCHOOLS offer a variety of academic courses, each course covering a semester's work of standard undergraduate and graduate levels, and courses in the professional fields of Commerce, Law, Medicine, and Social Work.

NAVY RESERVE OFFICERS' TRAINING CORES—Male students admitted to the undergraduate colleges are eligible to apply for membership in the Naval R.O.T.C. Information may be obtained at the Navy Building on the Tulane Campus.
